P. 4 Introduction

P. 8 D3: Design, Develop, Deliver

P. 10 One takeoff

P. 12 One dialogue

P. 14 One final product

P. 19 One team. Endless posibilities.

EVERY STEP OF THE WAY

Innovation starts with understanding people. Not with materials, machines or technology, but with improving the everyday experience of those who rely on your product. To achieve this, we at CoverWorks created the D3 approach: **Design, Develop, Deliver.**

This approach forms the foundation of every CoverWorks project. Partnering with us means more than having your product manufactured. It means being guided and supported throughout the entire process, from the first conversation about your ideas to the moment your product is ready to use, with every step in between managed through a collaborative, multi-stakeholder approach.

WE'VE GOT YOU COVERED

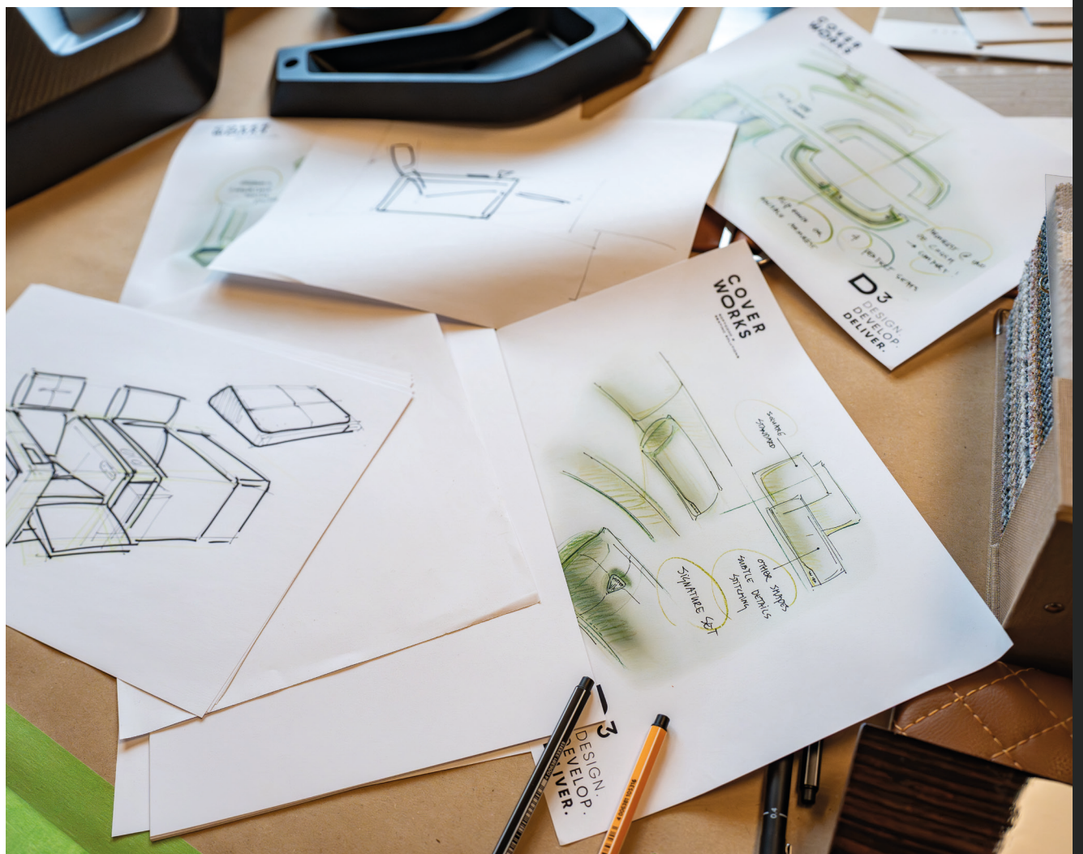
CoverWorks operates within three specialised divisions: **Luxury**, **Health** and **Industry**. Within our Luxury division, we develop fully custom One Off seating solutions where architectural precision and craftsmanship define every detail.

In this leaflet, we show how our D3 approach transforms an architectural concept into a one-of-a-kind seat for high-end yachts, refined through complex design challenges and pushed beyond convention.

D3

DESIGN.
DEVELOP.
DELIVER.

Our Design, Develop, Deliver approach is the foundation of everything we do. What does working with us mean for you? It is about more than simply manufacturing your product, it means guiding and supporting you throughout the entire process, from the first discussion of your ideas to the moment your product is ready to use, and everything that must happen in between.



01 DESIGN

This journey begins by understanding your ideas, needs and requirements in full. This gives you a clear plan and concept that align with your vision. By combining your perspective with our market knowledge and user insights, we translate your ideas into functional and practical solutions.

02 DEVELOP

At this stage, every element of the design is refined. Prototypes are produced and rigorously tested to ensure that performance, comfort and aesthetics meet and exceed your expectations.

03 DELIVER

Whether for small-scale production or global rollouts, we oversee manufacturing, logistics and quality control from start to finish, ensuring that your products are delivered on time and ready to use.

D3

DESIGN.
DEVELOP.
DELIVER.

Specific requirements, such as adjustability or spatial limitations, sharpen the creative process. They push design and engineering to work in harmony from the very beginning, ensuring the seat integrates seamlessly within the yacht's architectural identity.

ONE TAKEOFF

Every One Off starts with the architect's design language. Sometimes fully developed, sometimes defined only by volume and placement within the yacht's layout.

In close collaboration with the yacht architect, we analyze geometry, ergonomics, proportions and material intent. We visualize, refine and ensure feasibility without altering the integrity of the design.

D3

DESIGN.
DEVELOP.
DELIVER.

With One Off projects, Design and Develop move in constant dialogue. Because each concept is unique, there is no fixed production route to follow. Instead, designers and developers refine the seat together, testing feasibility, adjusting proportions and resolving technical challenges as they arise.

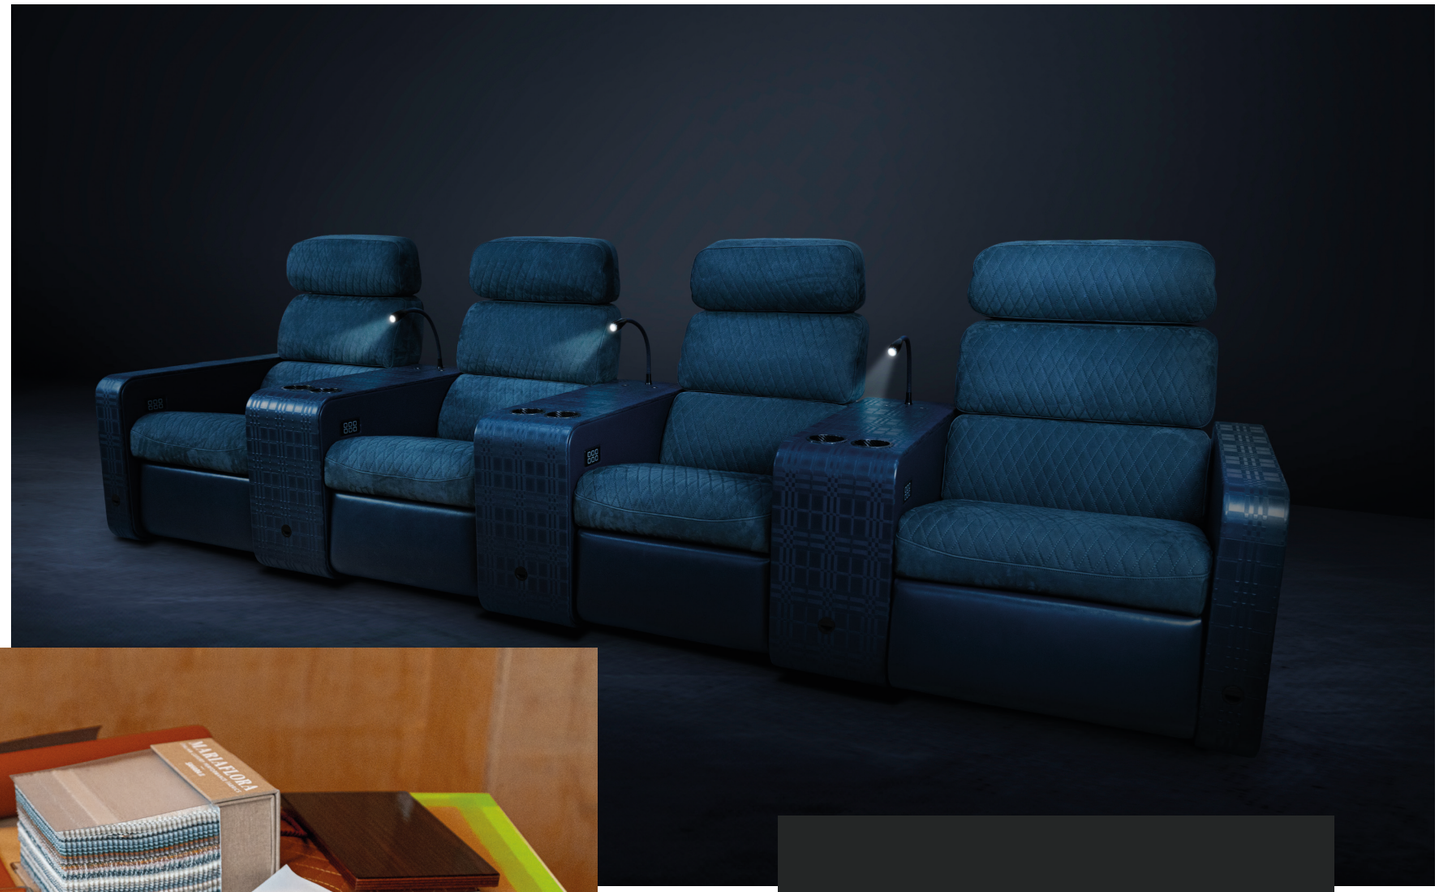
ONE DIALOGUE

We translate initial sketches into detailed 3D models using advanced CAD software. Every contour, stitch line, foam structure and mounting point is carefully defined before production begins.

Prototypes are created and evaluated to assess comfort, ergonomics and detailing. Materials are validated, constructions adjusted and visual balance reconsidered where necessary. In most cases, production techniques such as advanced 3D printing replace mold-based methods, allowing greater flexibility without the investment of large-scale tooling.

D3

DESIGN.
DEVELOP.
DELIVER.



ONE FINAL PRODUCT

Once approved, production begins under strict control of quality, planning and execution. Whether it concerns a single installation on a superyacht or a fully custom seating concept tailored to the identity of a specific vessel, we manage manufacturing, quality control and logistics from start to finish.

Within our One Off series, the custom cinema seat stands out as a project that truly challenged the entire D3 process. Its architectural complexity, technical requirements and spatial constraints demanded close collaboration between design and development at every stage. The final result not only fulfilled the client's vision, but also strengthened our own expertise.

From first concept to final installation, every One Off represents a shared journey between client, architect and CoverWorks, unique in outcome and refined in execution.

A SEAT THAT SETS NEW STANDARDS

A CoverWorks One Off seat is a one-of-a-kind experience. It is a project defined by unique challenges, creative flexibility and lasting impact.

Defined by creativity, luxury and personality, it becomes a natural extension of the yacht's architectural identity while ensuring exceptional seating comfort.

Designed with vision.
Developed with precision.
Delivered with confidence.

ONE TEAM. ENDLESS POSSIBILITIES.

Looking to create a truly one-of-a-kind seat?
Let's explore what fits your vessel.
