ABOUT US

COMPREHENSIVE SERVICE FROM BEGINNING TO END

At CoverWorks, we transform your ideas into fully realized products without the need to engage multiple developers or suppliers. We serve as a single, reliable partner. Your one point of contact, managing every stage of the process on your behalf.

Through our Design, Develop, Deliver (D3) methodology, we provide a structured and transparent pathway from initial concept to final delivery, led by professionals who understand and prioritize your objectives. Leveraging advanced in-house technologies and maintaining an unwavering commitment to service excellence, quality and sustainability, we have achieved international recognition for our expertise in designing, developing and delivering premium upholstery, softgoods and textile solutions across the luxury, health and industrial sectors.

We believe in close collaboration with our clients, working alongside you every step of the way to ensure each product meets the highest standards and aligns perfectly with your vision and requirements.

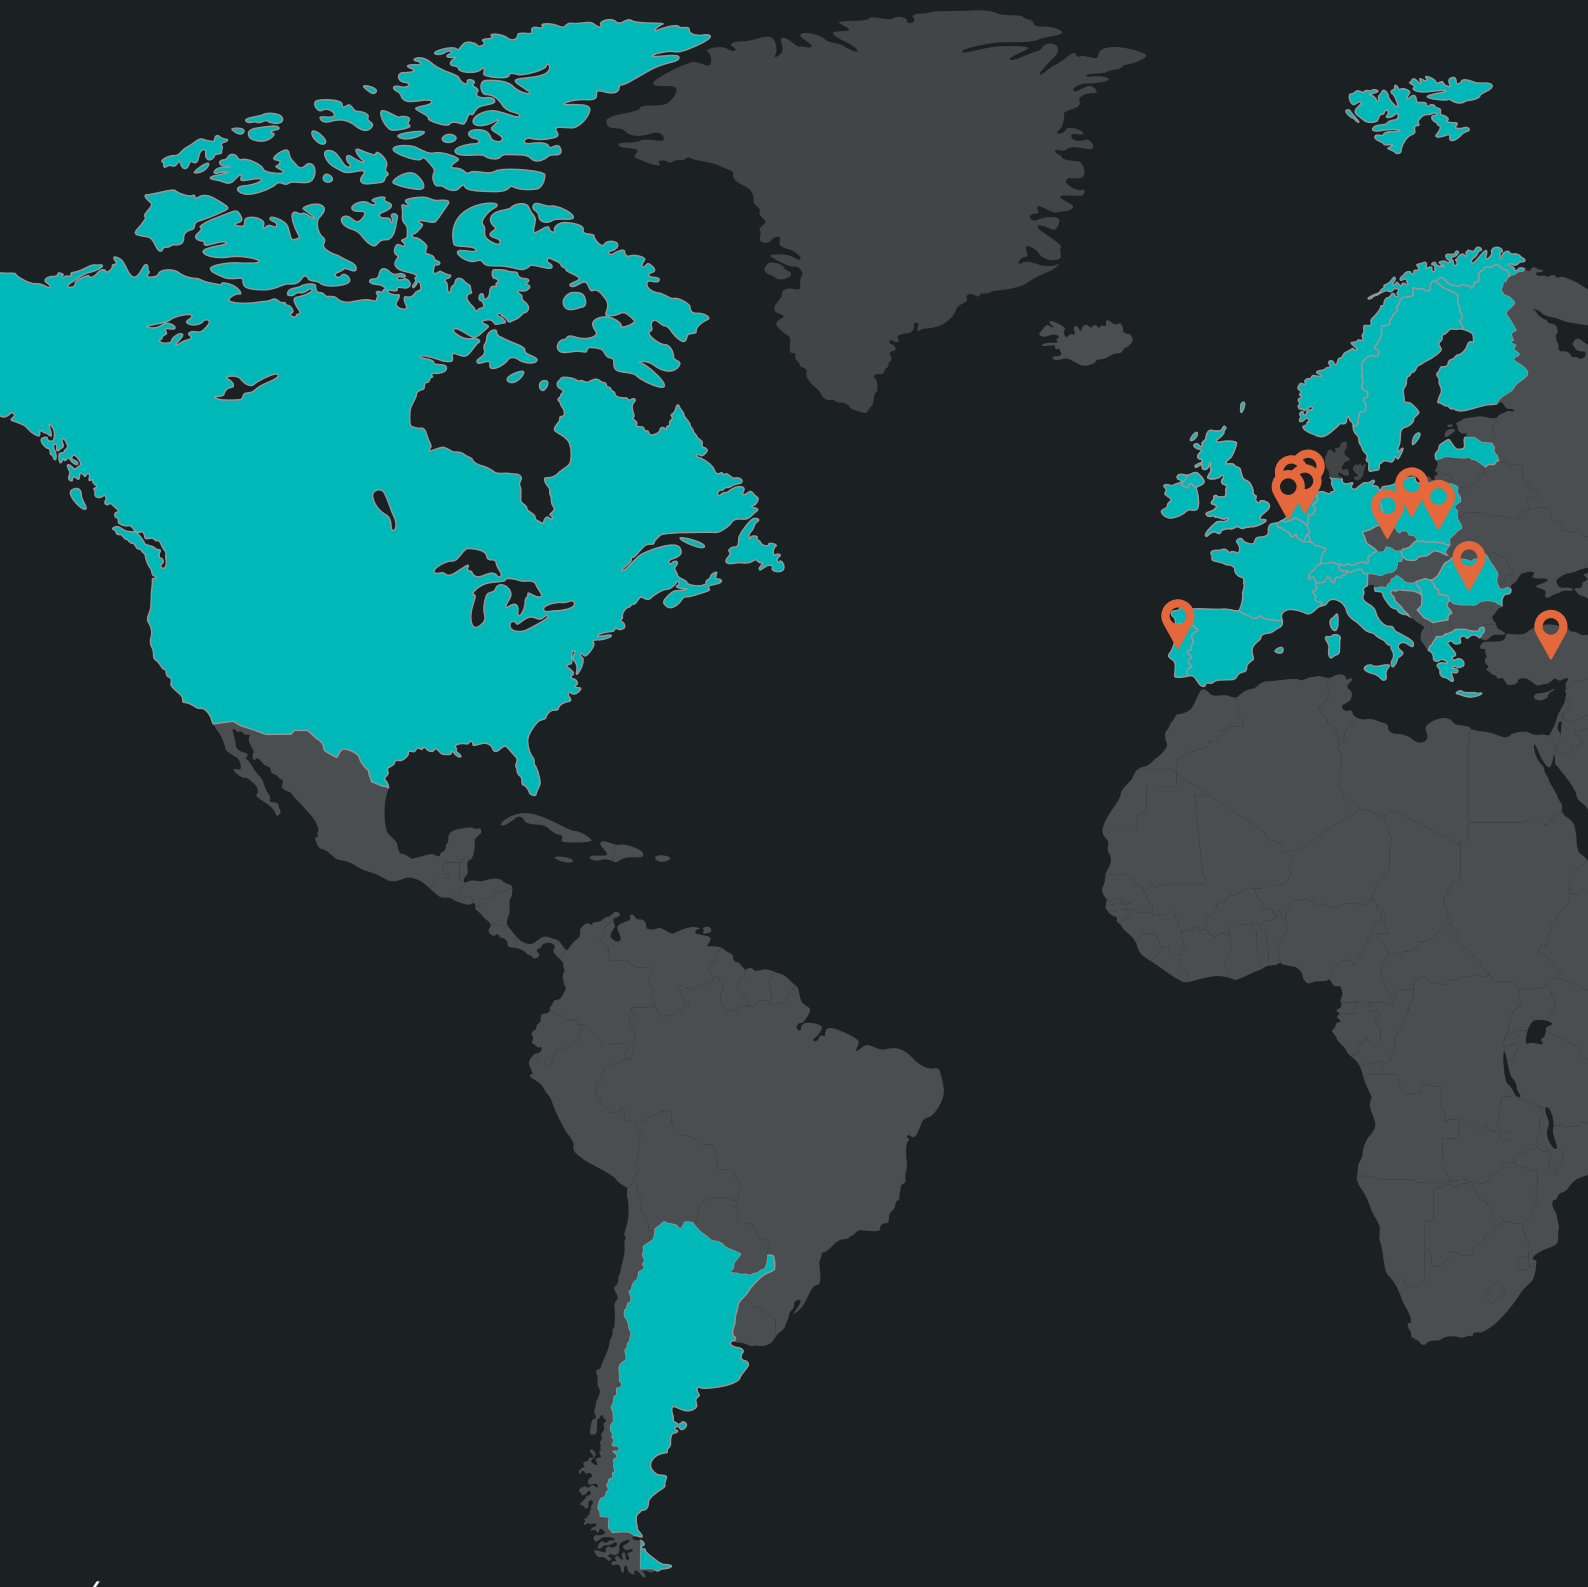
Here's what you can expect:

- ✓ A product shaped to fit your requirements.
- ✓ Consistent quality checks at every step.
- ✓ Options designed with sustainability in mind.
- ✓ Regular updates so you always know the status.

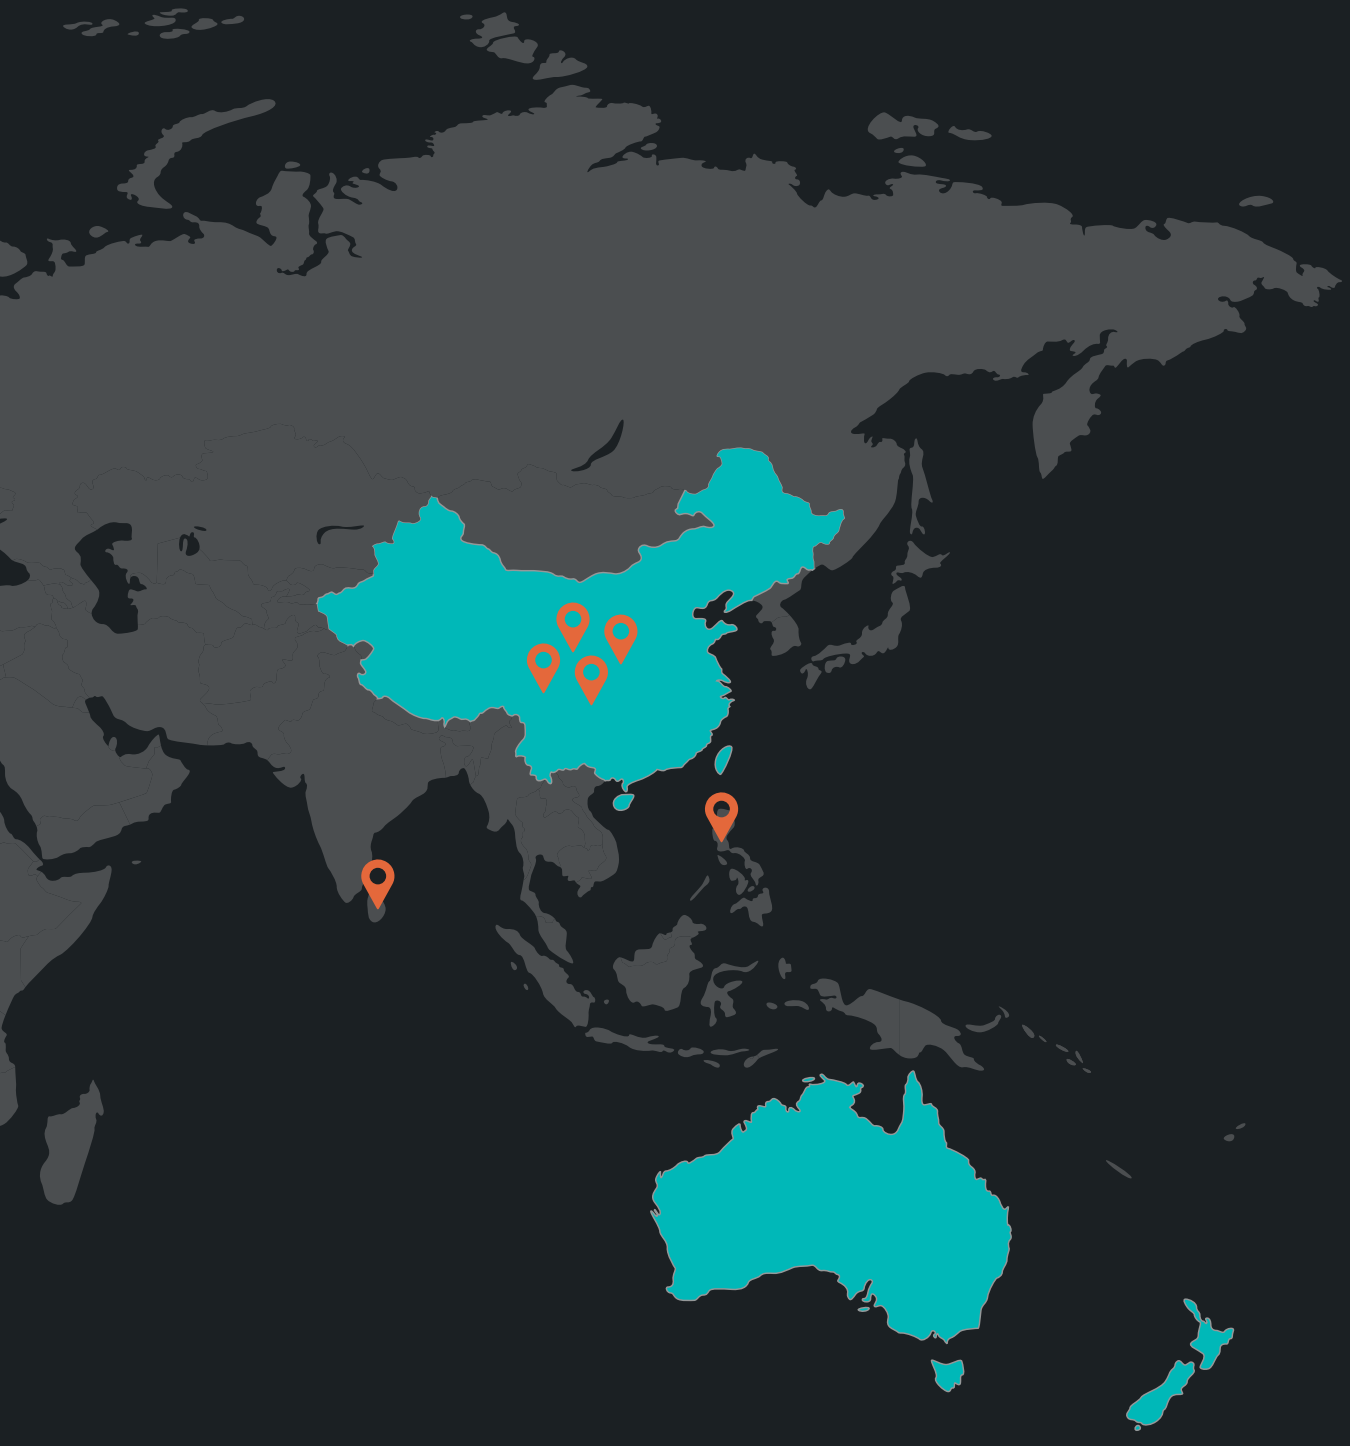
GLOBAL PRESENCE.
DUTCH EXPERTISE.

CUSTOMERS

PRODUCTION



With production and client support hubs across Europe and Asia, and our headquarters in the Netherlands, we bring Dutch precision to a global stage. Whether you need rapid prototyping, cost-effective high-volume production or small-scale premium craftsmanship, we manage every stage, from design to delivery, so you get consistent quality, on time, every time.



INTERVIEW

FROM SAILING PROS TO BUSINESS PARTNERS

Jeroen and Gerhard first crossed paths on the water, competing against each other as professional sailors. Over the years, they each collected several world titles, until in 2004 they decided to join forces under the name CoverWorks.

It all began in 2000, when Gerhard started freelancing in a small sail repair shop in Muiderberg. That same year, he registered his own business at the Chamber of Commerce, laying the foundation for CoverWorks.

In 2004, Gerhard moved to The Hague, where he opened his own workshop equipped with professional machinery. With a growing customer base and a steadily expanding reputation, the company began to take shape. Soon after, Jeroen came on board. When the opportunity arose in 2010, he officially joined as a partner.

Since then, Jeroen and Gerhard have been steering the business side by side, with the same drive and determination they once brought to the water as professional sailors.

FROM SMALL WORKSHOP TO GLOBAL PLAYER

Twenty-five years later, the picture looks very different. What started as a small-scale, artisanal operation producing boat covers, spray hoods, and other textile products for leisure boating has grown into a company delivering high-end projects worldwide for prestigious clients.

The scope has expanded significantly. Today, CoverWorks serves not only the maritime sector but also the healthcare and industrial markets - handling not just product manufacturing but also engineering and supply chain management.

Left: Gerhard van Geest
Right: Jeroen van Leeuwen

"BY INVOLVING US EARLY IN THE DESIGN PHASE, WE CAN DEVELOP A COMPLETE SOLUTION, OFTEN WITHOUT EXTRA COSTS"

FULL CIRCLE DESIGN & MANUFACTURING PARTNER

By 2025, the company's approach can be summed up in three words: Design, Develop, Deliver. This D3 concept grew out of the realization that client-provided designs could often be improved. CoverWorks offers alternative proposals, refines the design and takes full responsibility for production.

"In the marine sector, you often see things that could be made better or more complete," says Jeroen. "When we're involved from the design phase, we can create a complete solution, perfectly aligned with both style and function, often without extra cost."

This approach now works just as well in healthcare. Gerhard adds: "We've shifted from simply executing orders to taking the lead in product development. By being involved from the very first sketch, we are able to influence the decisions that matter. In a way, we've become a full circle design, manufacturing & supply chain partner."

A PROJECT TO BE PROUD OF

One standout example is a project for a manufacturer of heated cushions. CoverWorks was involved from the first concept, supporting production from 8,000 units to an impressive 500,000 - helping the client grow rapidly. Today, the company operates independently, but the foundation was built in large part thanks to CoverWorks.

"MISTAKES ARE PART OF THE PROCESS, AS LONG AS YOU LEARN FROM THEM."

The company culture is flat, approachable, and innovation-driven. "Sometimes you just have to act, just do it, because that's when real innovation happens," says Jeroen. "A product can almost always be improved, so keep developing. There's no finish line. And of course, mistakes are part of the process, as long as you learn from them."

Jeroen and Gerhard also believe hard work should go hand in hand with enjoyment. Work hard, play hard. Teambuilding events, having fun in the workshop and celebrating successes are an important part of the company.

AMBITION AND AN ATHLETE'S MINDSET

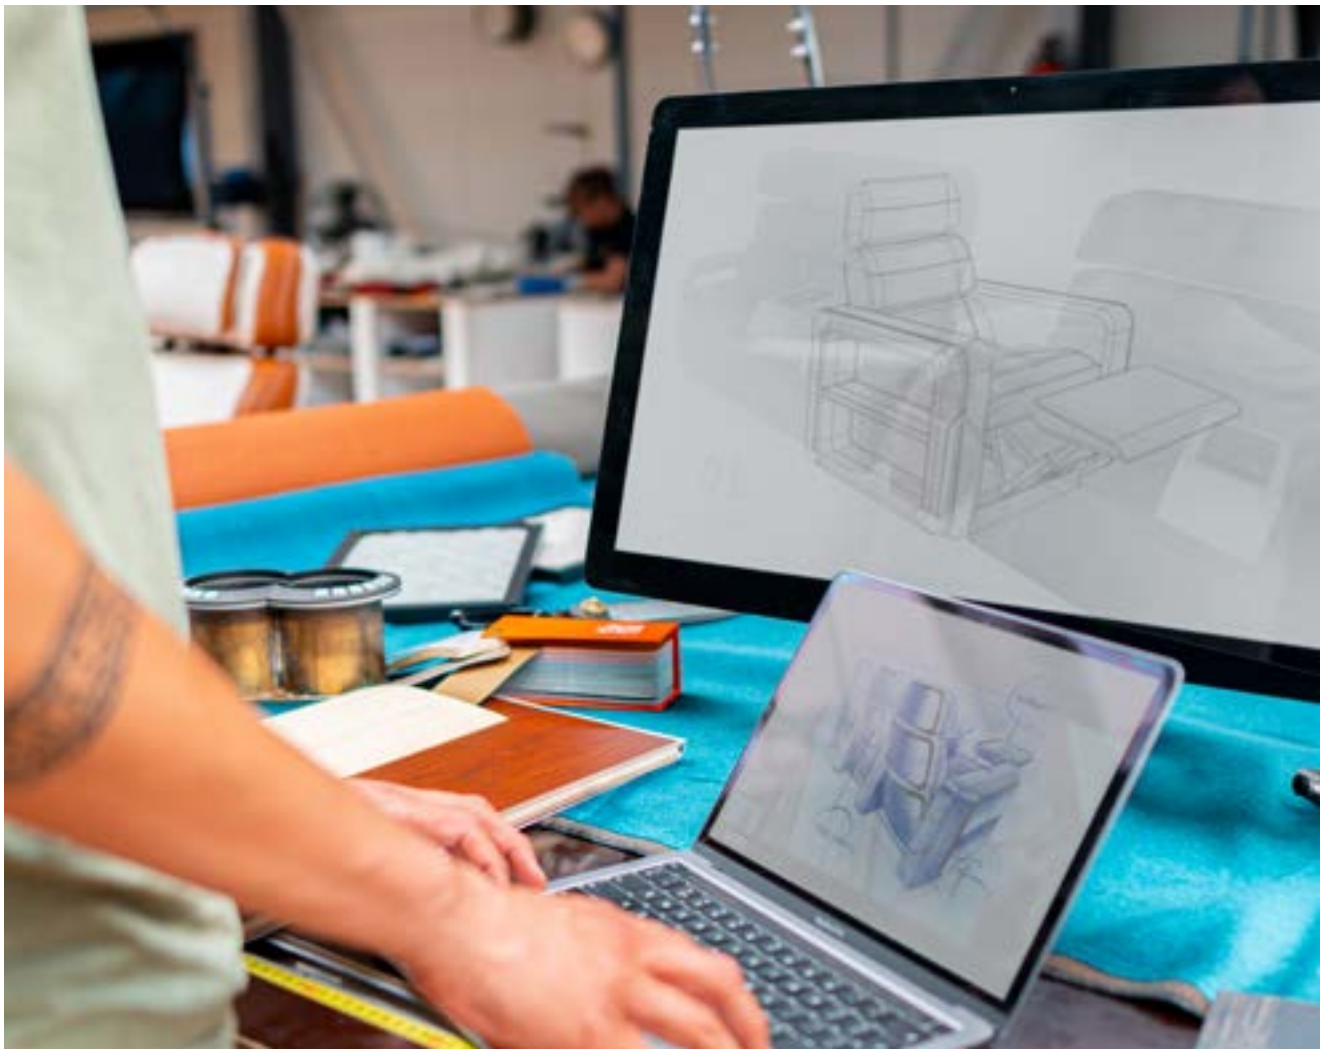
Ambition is never in short supply. By 2035, CoverWorks aims to be the leading global Design, Develop, Deliver partner for textile solutions and seating. "Textile is in every market, so the opportunities are endless," says Gerhard. "The sky is the limit. But we'll keep our focus on the markets we know best, to maintain our quality and expertise."

Their drive for innovation comes straight from their background in competitive sports. "In sports, you're always looking for ways to make things lighter, stronger, and better," Jeroen explains. "If it breaks, it wasn't strong enough. If it doesn't break, it's too heavy. That push to test limits and embrace new techniques is deeply woven into our DNA. It's also how our way of working has evolved over the years into what we now call our D3 approach."

D3

DESIGN. DEVELOP. **DELIVER.**

Our Design, Develop, Deliver approach is the foundation of everything we do. Working with us means more than simply manufacturing your product - it means guiding and supporting you throughout the entire process, from the first discussion of your ideas to the moment your product is ready to use, and everything that must happen in between, all through a multi-stakeholder approach.



01 DESIGN

Your vision is our starting point. By listening closely to your ideas, needs, and requirements, we create a clear plan and concept. Combined with our expertise in upholstery, market knowledge, and user insights, we can launch every project in the best possible way. By being involved from the very first sketch, we help shape the decisions that matter, avoiding potential issues later in the process.

---

02 DEVELOP

Your product takes shape here. This is where every element comes together and the design is refined in detail. Prototypes are created and undergo rigorous testing to secure the right balance of performance, comfort and aesthetics. By addressing improvements early, the design is validated and ready for production with confidence.

---

03 DELIVER

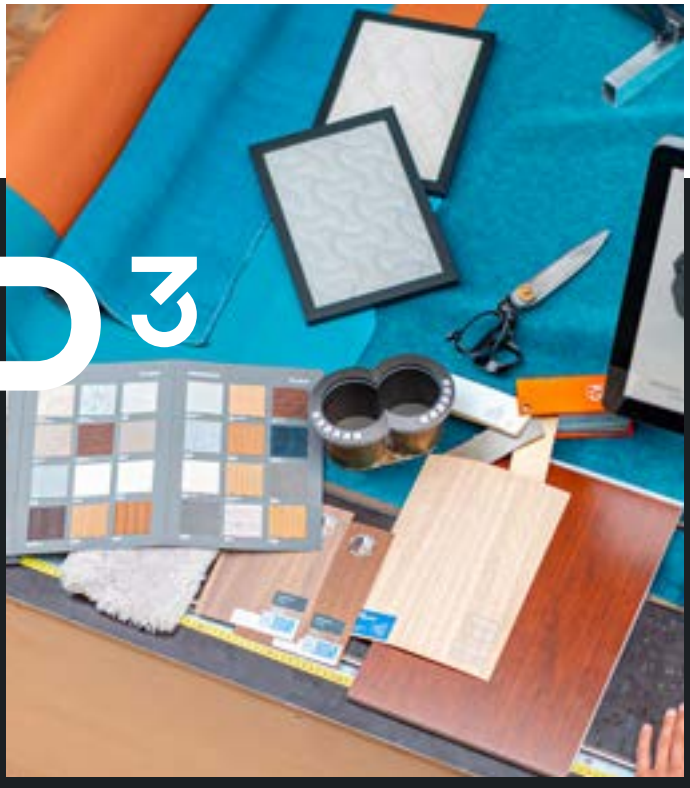
Your idea becomes reality. For both small-scale and global production, manufacturing, logistics and quality control are coordinated throughout the process. Every detail is managed to guarantee that products are delivered on time, ready for use, and fully aligned with your expectations.

DESIGN

Your product's success begins with a design that truly meets your needs and the needs of its users. From the very first conversation, we focus on understanding your goals and expectations so that the solutions we develop are completely aligned with your ideas.

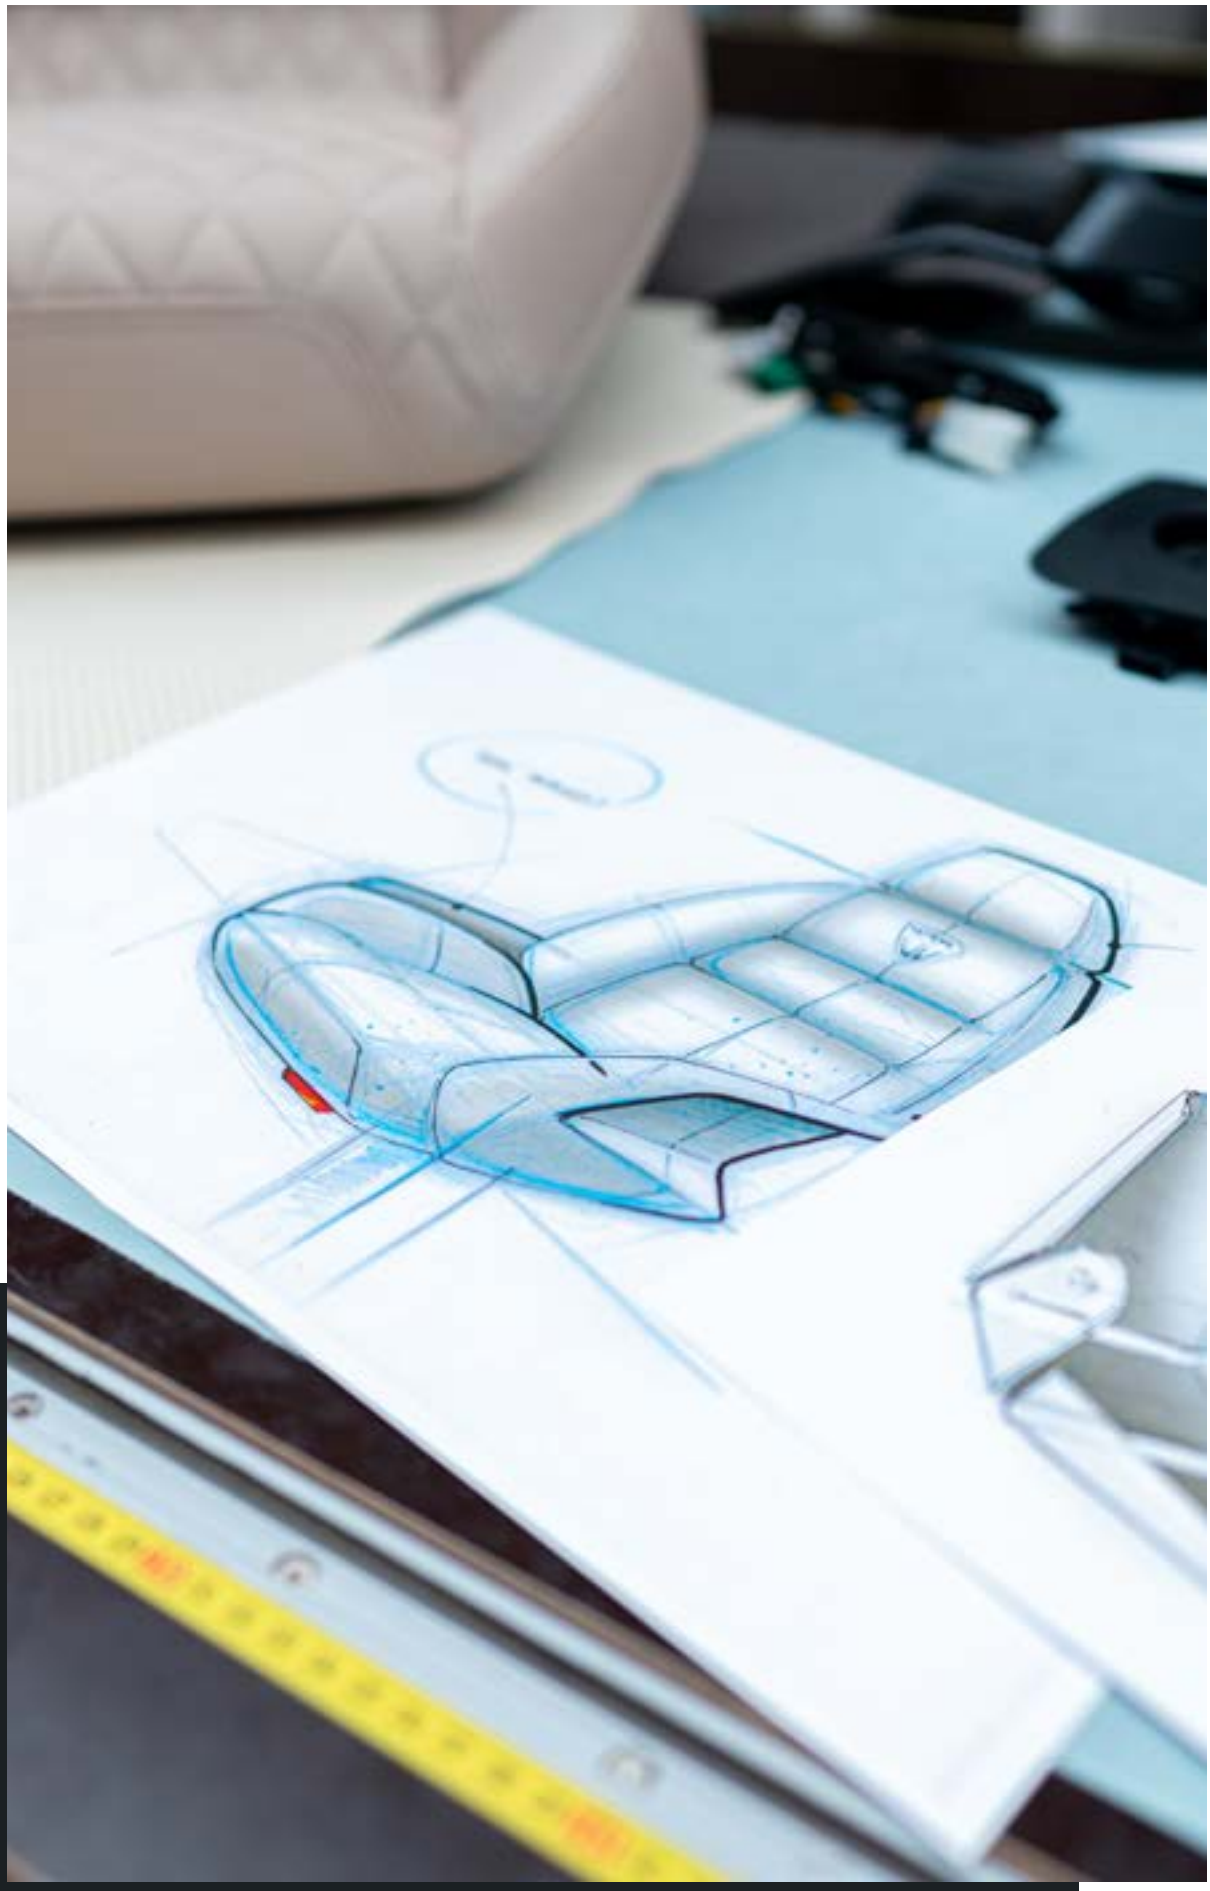
By examining the habits, needs and preferences of the people who will use your product, we ensure it not only works but also delivers real value; for example, by enhancing performance, supporting well-being, or improving everyday activities.

With these insights, we create a clear plan and roadmap that guides every decision. The result is a product concept that combines the right functionality, design and user experience.



D3

Scan for more info



DEVELOP

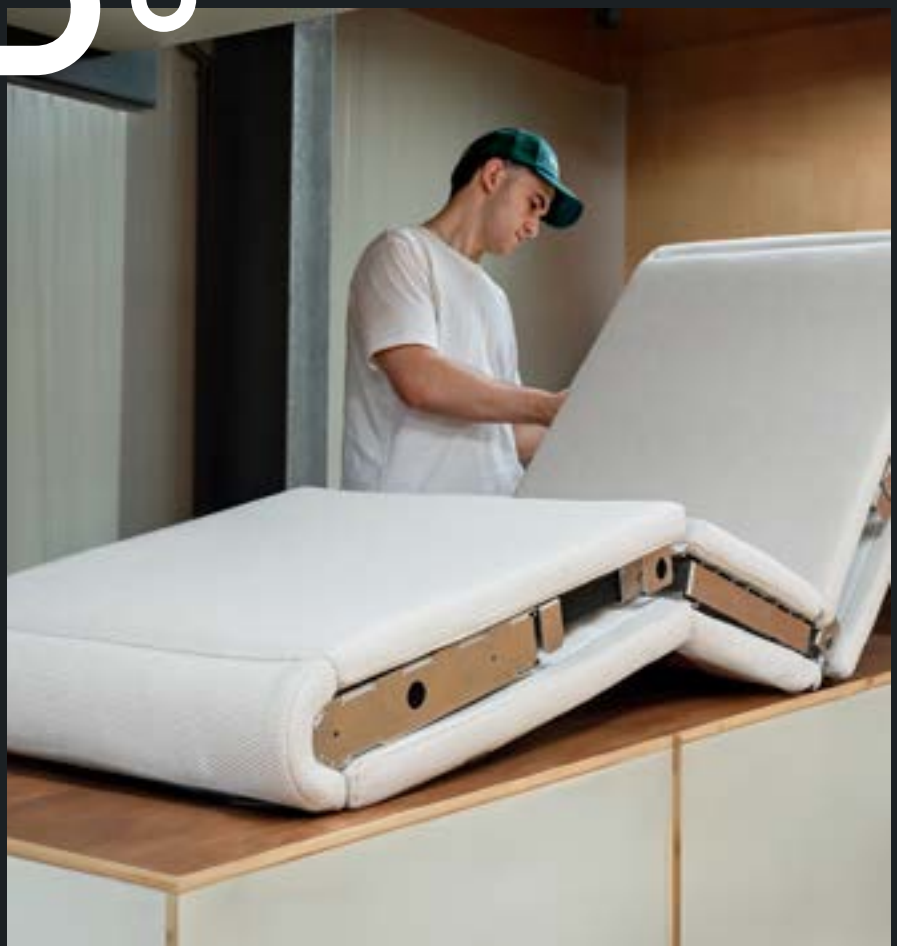
In this stage, we refine every element of the product design in close collaboration with you, whether it's a completely new creation or an improvement to an existing product.

Scan for more info

We manage the entire development process on your behalf, including strategy, planning, prototyping, testing and preparation for production. This ensures that every decision about materials, features and design details supports your objectives and meets user needs.

Potential challenges are identified and resolved early, so you can be confident that the product will function exactly as intended. We approach development as a continuous cycle of building, testing and refining, guaranteeing that by the time the design is finalized, everything is ready for a seamless transition into production.

D3



DELIVER

We bring your product to life in production, whether through small runs or high-volume batches.

With strategically located production facilities across Europe and Asia, and our headquarters in the Netherlands, we can take full ownership of the supply chain, managing every step for you – from assembly and mounting hardware to packaging, logistics, quality control and distribution – so you can rely on a smooth and consistent process from start to finish.

Whether production is handled in-house or through trusted partners, we ensure seamless coordination, optimized lead times, minimized risks and reliable delivery, giving you confidence that your product arrives ready to use, on time, every time.

LUXURY SOFTGOODS & SEATING SOLUTIONS

In In the luxury market, the smallest details make the biggest difference. We create upholstery and softgoods that not only meet the highest technical standards, but also reflect elegance, exclusivity and your brand DNA. From superyacht interiors to bespoke pilot seats or custom cinema seating, our D3 approach ensures a smooth, stress-free process, delivering results that impress your clients from the first sketch to the final reveal.

LUXURY

HEALTH

INDUSTRY

YACHT UPHOLSTERY

CREATING UNIQUE ON-BOARD IDENTITIES

We specialize in designing and crafting upholstery for luxury yachts, for example: limousine tenders, open tenders and chasers. We provide bespoke solutions tailored to reflect your brand while considering the unique characteristics of each series.

Our extensive range of premium materials and designs enhances both the visual appearance and comfort of your yacht. In addition, our upholstery is engineered to withstand the elements and most demanding marine environments.

From concept to completion, our skilled specialists guide you through the entire process, providing material consultation, prototyping and supply chain coordination. Our ultimate goal is to help you achieve the best possible outcome, without the stress of managing every detail.

PILOT SEATS

OUR DESIGN, DEVELOPMENT AND DELIVERY PROCESS

01

Conceptualization:
We translate your ideas and the visual language of your vessel into a detailed concept sketch.

02

Digital 3D Design:
The concept sketches are translated into precise digital 3D models using CAD software.

03

Modelling & Feedback:
A one-piece model is created to facilitate review and feedback before moving forward.

04

Prototyping:
A real-life, fully upholstered prototype is produced to evaluate appearance and comfort.

05

Fabrication & Delivery:
Once approved, we initiate production and offer continental shipping to deliver the final product directly to your doorstep.

CINEMA SEATS

CRAFTING YOUR CINEMATIC EXPERIENCE

Transform your (onboard) entertainment into an unforgettable experience with our custom-designed Cinema Seats, where comfort, luxury and style come together.

At CoverWorks, we help bring your creative vision to life while ensuring every detail performs flawlessly. Every seating is engineered to move in perfect harmony with the body, keeping guests comfortably supported throughout the entire movie without the need for constant adjustments.

One of our latest innovations is an in-house frame that delivers exceptional comfort while addressing common design challenges. With a cleverly engineered 20 cm extra recline in back-row seats, you gain flexibility, optimize space and maintain the highest standards of comfort, aesthetics and luxury.

The result? A cinematic experience at sea or at home that's as exclusive as your vessel itself.

TECHNICAL SOLUTIONS FOR THE HEALTH INDUSTRY

When it comes to health, there is no room for compromise. Products must meet the highest safety and certification standards while providing long-term functionality and comfort.

At CoverWorks, we design and manufacture textile solutions that meet these demands, combining safety, hygiene, and durability with optimal user comfort. From advanced wheelchair seating to specialized support systems, our products are tailored to help people with health challenges, mobility issues or complex seating needs live more comfortably and independently.

With decades of experience and our proven Design, Develop, Deliver approach, we create solutions that not only comply with strict regulations but also enhance health, well-being and quality of life.

QUICKIE

SEATING SOLUTIONS

SEATING UPHOLSTERY WITH PURPOSE

You need seating systems that meet the highest standards of comfort, compliance, and durability - while fitting seamlessly into healthcare frameworks. We support you with tailor-made upholstering services and the design, development and delivery of complete seating systems.

SITTING FACT

Sitting affects your whole body and mind

Each solution is created with the end user in mind, ensuring comfort and functionality, while also helping you meet reimbursement requirements and regulatory standards.

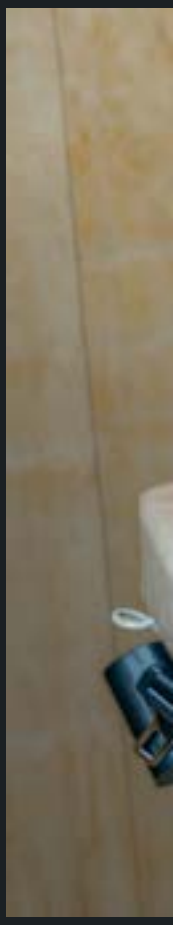
By choosing our sustainable seating solutions, you gain a partner who makes your work easier: reliable products, compliant processes, and long-term value for your organization and the people you care for.

Scan for more info

SEATING SOLUTIONS

STAIRLIFT UPHOLSTERY

We are your reliable manufacturing partner for medical devices like stairlifts, specializing in upholstery components and also offering expertise in chair design.



For a Dutch stairlift manufacturer, we contributed to the development of a stairlift featuring flame-retardant PU leather and foam components, CNC diamond-stitched backrests, and an additional armrest for left-handed users. The design also prioritizes a modern, home-friendly look, moving away from the typical institutional appearance. Using pre-made rail sections and bends, the stairlift easily adapts to a wide range of staircase configurations.

By partnering with CoverWorks, you gain access to large-scale production capabilities, flexible supply chain support, and stringent quality control. This ensures consistent upholstery quality, seamless integration with hardware and a smooth, efficient manufacturing process.

Scan for more info

The result: a smooth, efficient manufacturing process and a better user experience, combining comfort, safety and style.

SEATING SOLUTIONS

TRANSFORMING DRIVER WELL-BEING THROUGH CUSTOM SEATING

For professional drivers, the right seat isn't a luxury, it's a necessity for health, comfort and performance. Long hours on the road can lead to fatigue, discomfort and costly sick leave, which also fuels the industry's driver shortage.

At CoverWorks, we design custom Driver Seat inlays that fit each driver's unique body proportions and workspace. This ensures proper posture, optimal support and lasting comfort for the entire journey.

The result? Fewer injuries, lower absence costs and happier, more productive drivers who can perform at their best, every day.

Scan for more info

WHY CHOOSE A CUSTOM DRIVER SEAT?

01

Preventing Musculoskeletal Disorders (MSDs)

Driver seat inlays play a vital role in preventing MSDs: a major cause of absenteeism and discomfort. Solving this issue could save logistics companies over 80% of related annual costs, amounting to more than €2.44 billion across the industry.

02

Tailored Comfort

Each seat is customized to support posture, reduce fatigue and improve focus throughout long hours behind the wheel.

03

Driver Satisfaction

Comfortable drivers are happier, more productive and more likely to stay, boosting retention and morale.

04

Health & Well-Being

Proper alignment minimizes physical strain and promotes long-term musculoskeletal health.

05

Sustainable Innovation

Our bespoke approach reduces material waste and supports recyclability, offering a smart, sustainable investment in your fleet.

THE CUSTOM
DRIVER'S SEAT

DESIGNED WITH YOU, FOR YOU

The Custom Driver's Seat is part of our health division, focused on solutions that improve well-being, reduce strain and support long-term human performance.

Built on more than 25 years of seating experience, including deep knowledge from healthcare seating, this solution brings proven ergonomic insight into the daily reality of professional drivers.

On our website, we demonstrate how our D3 method comes to life through one of our most impactful seating solutions: The Custom Driver's Seat.

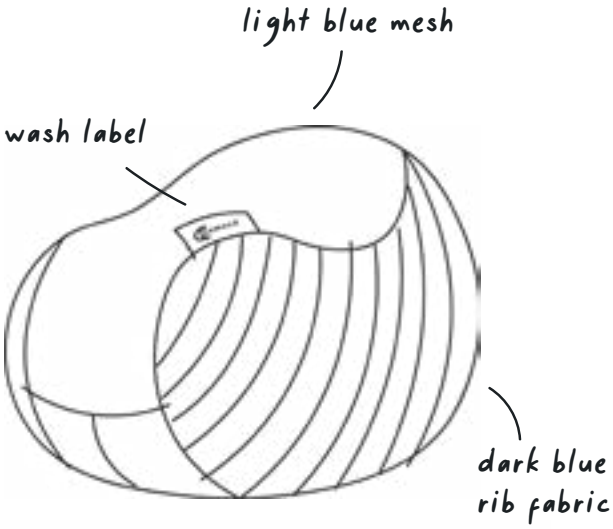
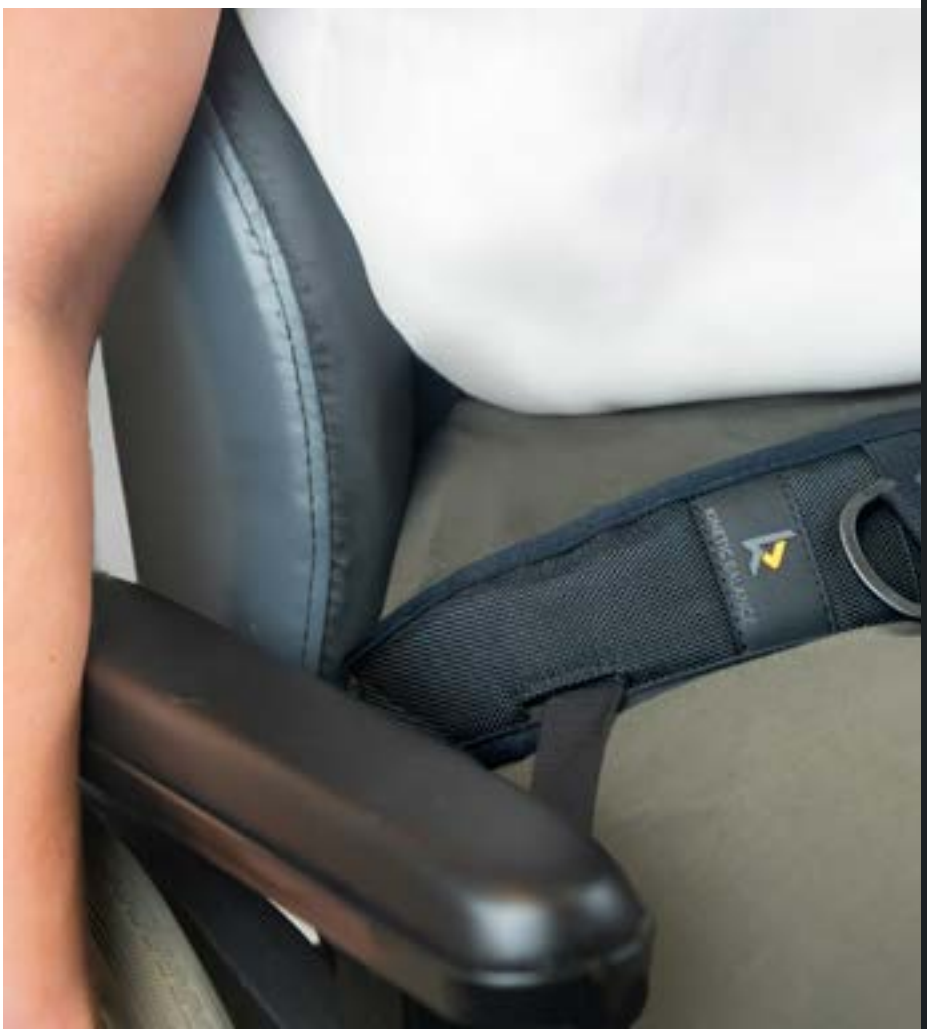
Our role was to design and create the covers, resulting in distinctive duo-coloured covers with dark blue rib fabric (100% polyester) and light blue mesh (100% polyester). Throughout the manufacturing process of these covers, we paid attention to every detail, from the zipper to the wash label, ensuring a product of outstanding quality. Each cover is finished with reinforced internal stitching and designed for a snug, secure fit.



MEDICAL DEVICES

EMPOWERING LIFES WITH POSITIONING PRODUCTS

We played a key role in developing a broad and versatile range of positioning products - including 2-point and 4-point hip belts, chest harnesses, and other supports - designed to encourage a healthy, functional seating posture for wheelchair users with postural deviations.



POSITIVE POSITIONING

The belts and harnesses are built for durability, safety, and ease of use, with every detail carefully considered and aesthetics thoughtfully integrated. Our dedicated team understands that product quality directly impacts user safety. That's why each component is meticulously designed.

With a strong focus on functionality and user needs, we contributed to the creation of a complete and adaptable product range that helps correct or accommodate postural deviations, improving the comfort, stability and overall quality of life of wheelchair users.

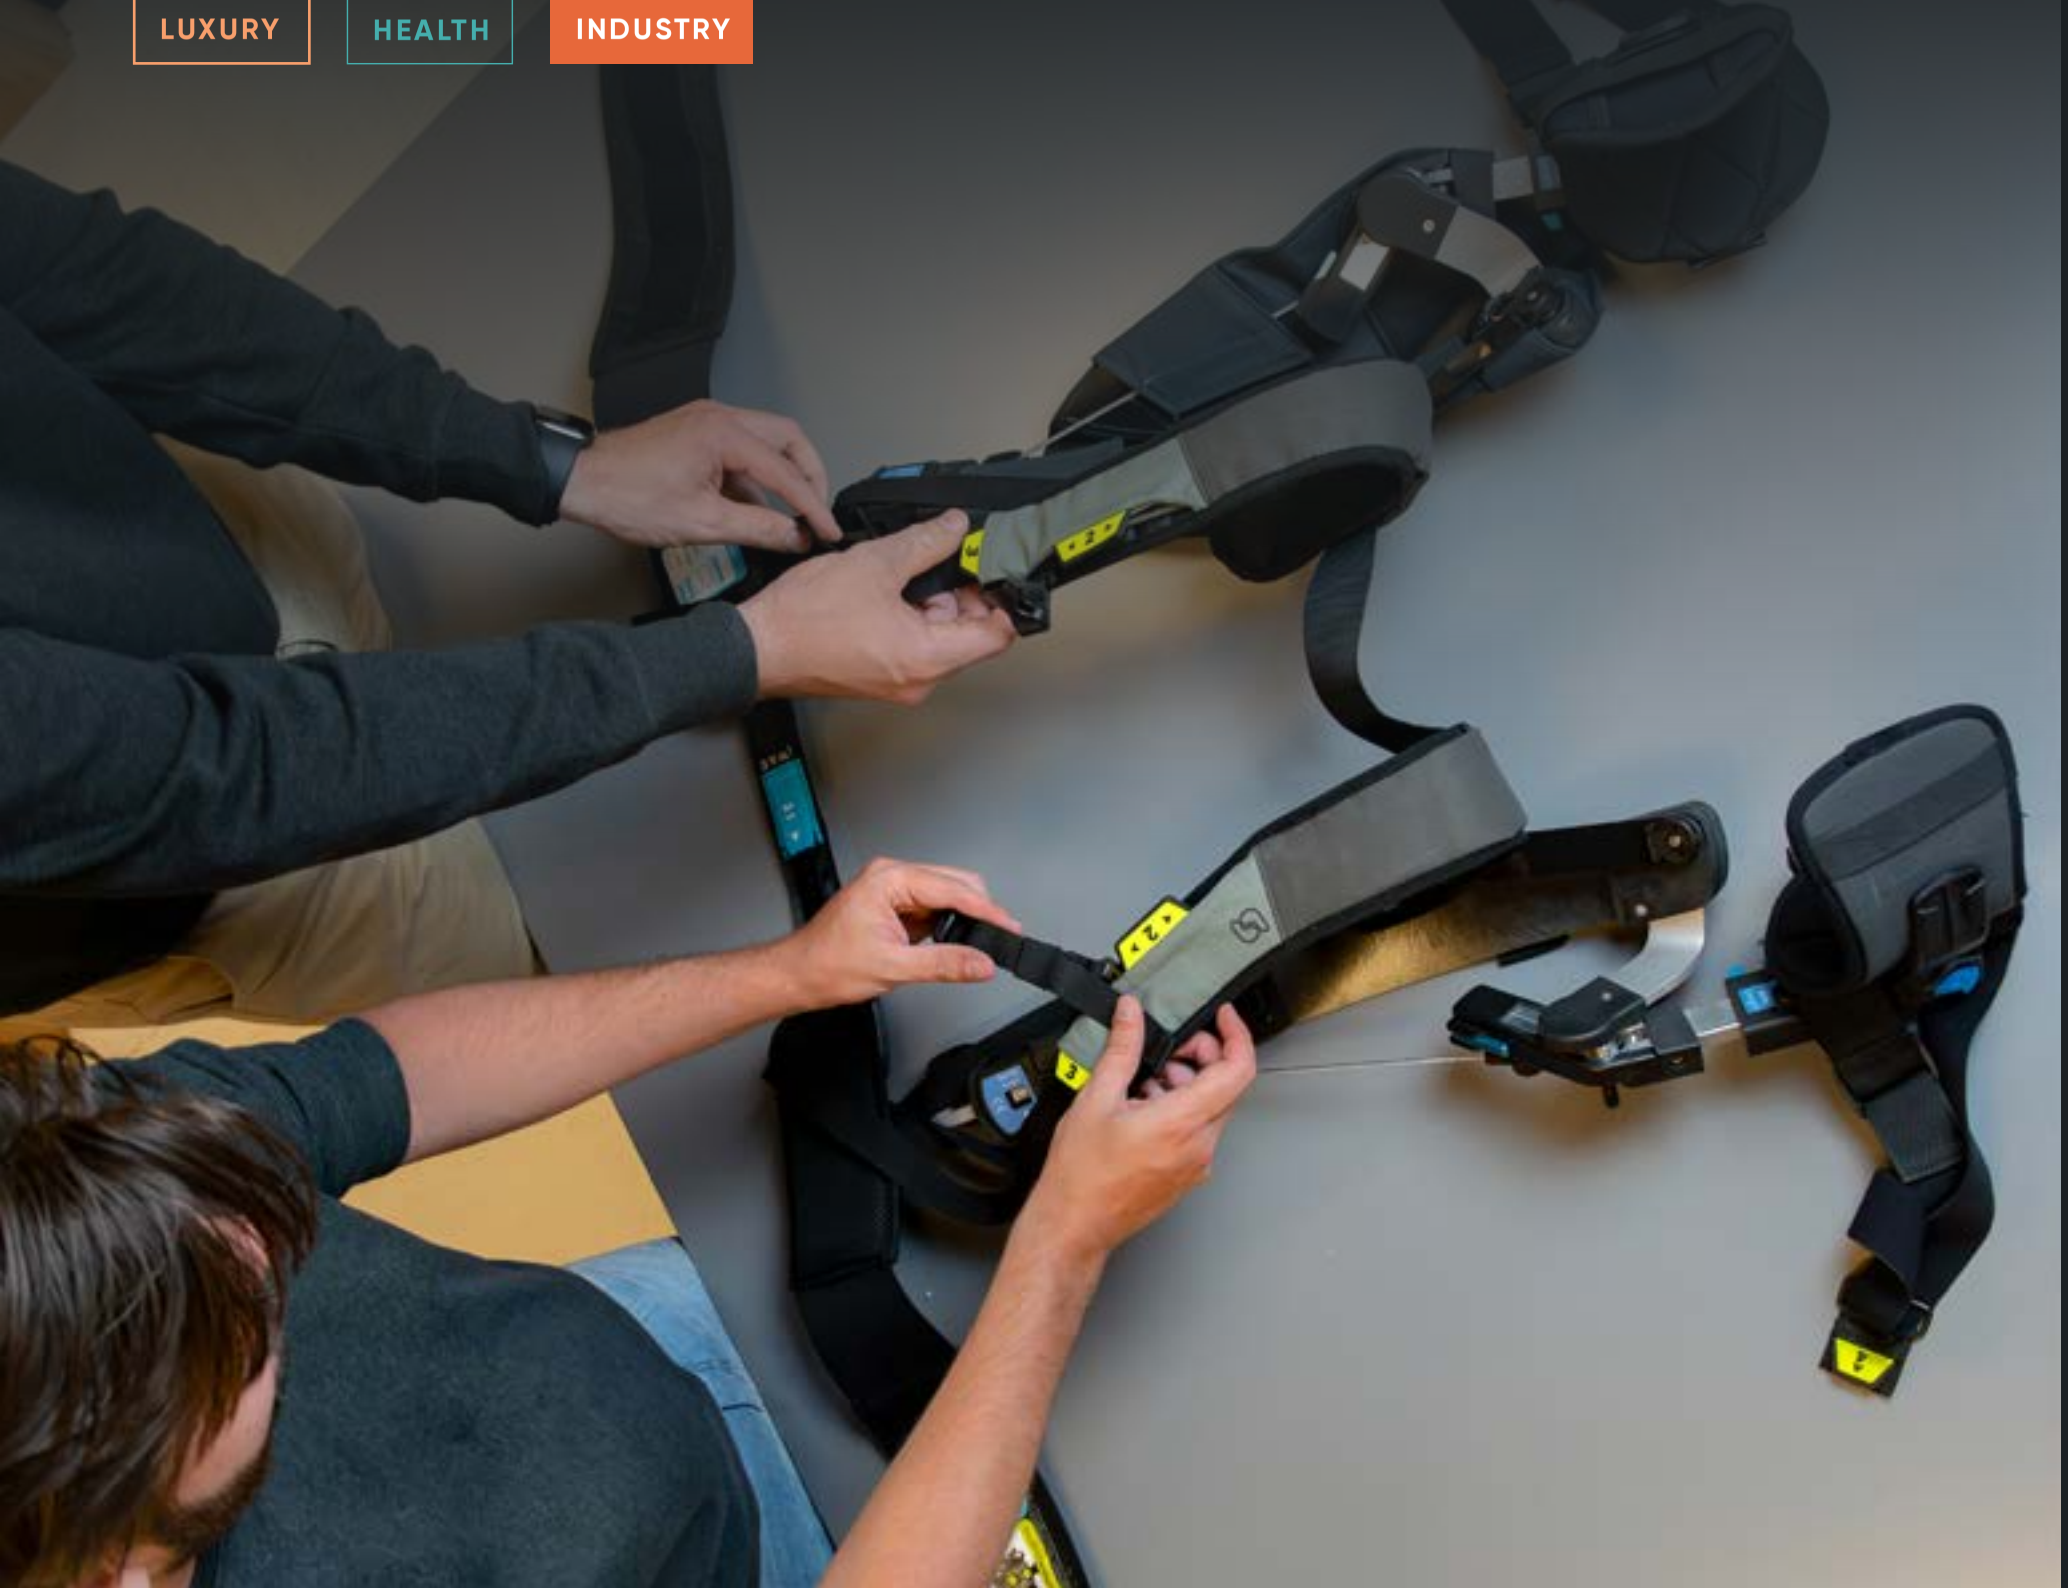
SMART TEXTILE SOLUTIONS FOR INDUSTRIAL OPERATION

Industrial environments demand durability, precision, and comfort. At CoverWorks, we combine textiles with hardware to create solutions that withstand extreme use while enhancing efficiency and ergonomics. Whatever the product, our Design, Develop, Deliver approach ensures it performs flawlessly, even in the toughest conditions.

We believe close collaboration is key. By combining your market knowledge with our extensive textile expertise, we develop innovative products that make a real difference - empowering your team, streamlining workflows, and simplifying everyday tasks.

Together, we turn ideas into practical, high-performing products that drive results and make your operations more efficient.



INDUSTRIAL SOLUTIONS

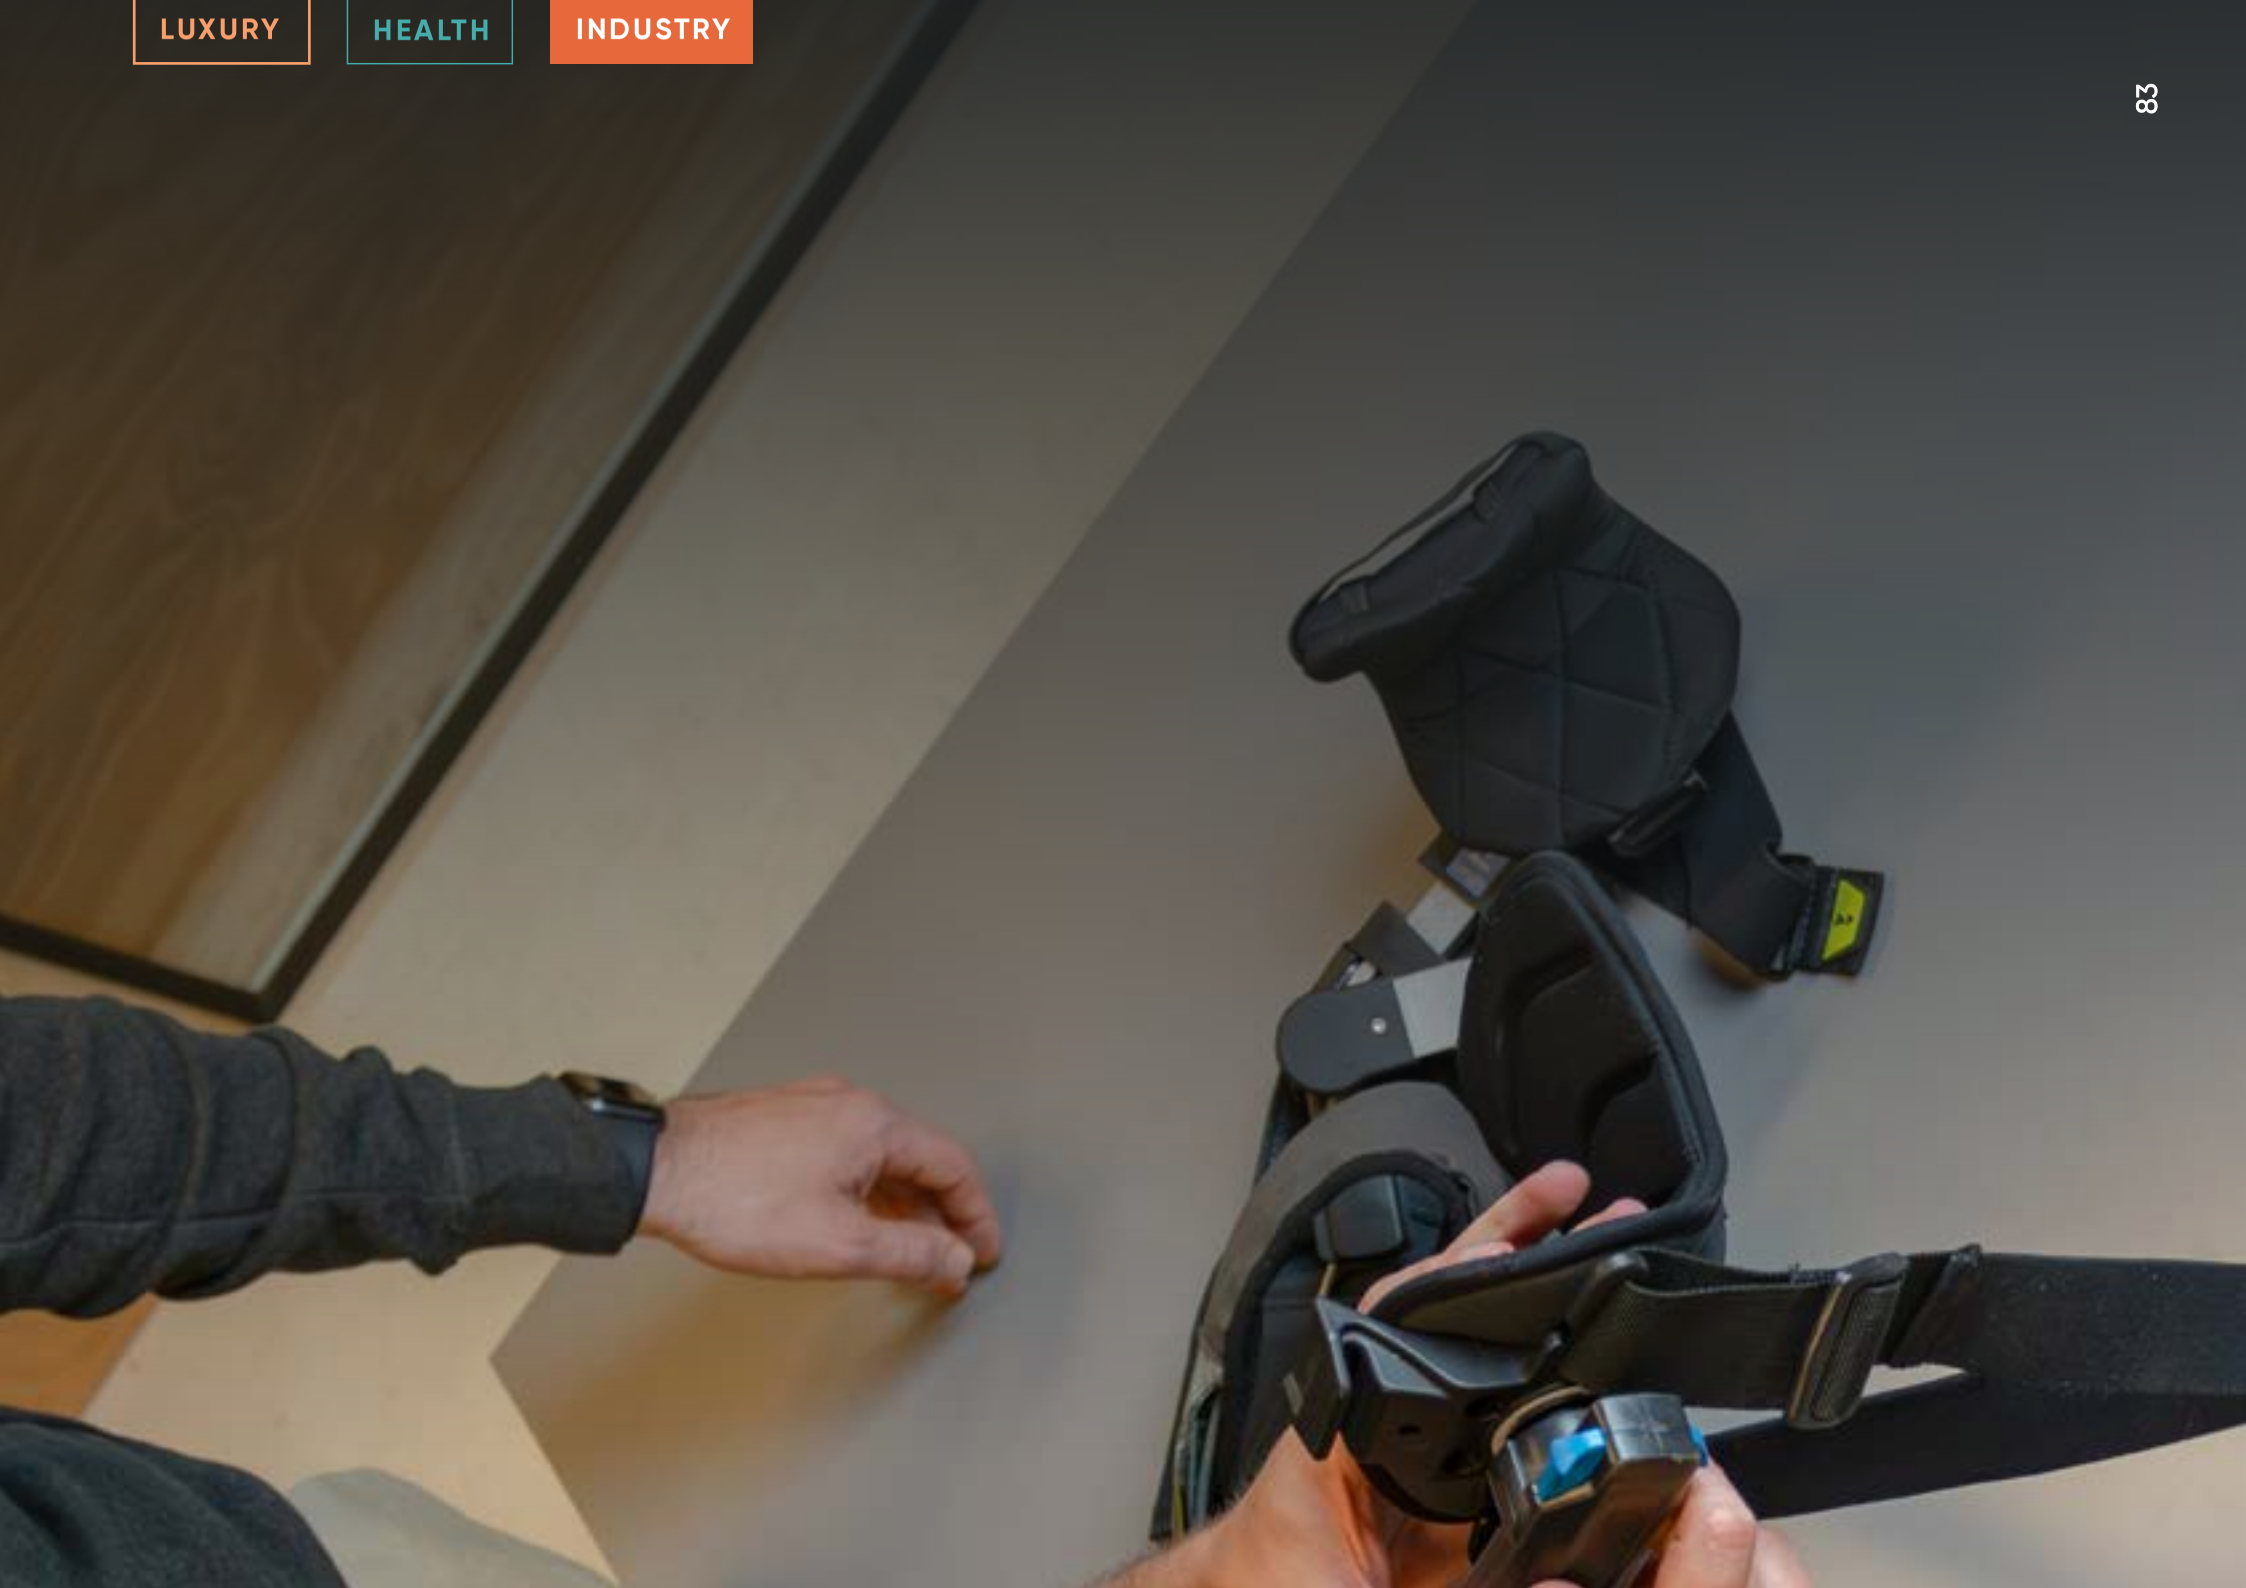
AN EXOSKELETON WITH COMPLEX TEXTILE-HARDWARE INTEGRATIONS

For a leading company in industrial operations, we were tasked with integrating hardware components and textiles into a cohesive product: a smart, functional exoskeleton that supports workers in demanding fields such as welding, plastering, mechanical work and painting.

Focused on enhancing comfort and efficiency, the exoskeleton features durable materials such as TenCate TecaSafe® and Kevlar® Nomex® for fire resistance and long-lasting performance. The soft components, including adjustable arm cups, harnesses and a reinforced hip belt, provide essential support and reduce strain during intensive tasks.

With an ergonomic design, these textile elements ensure a better fit and greater freedom of movement, making construction and industrial work both more comfortable and more efficient.

Scan for more info



INDUSTRIAL SOLUTIONS

REUSABLE TRANSPORT & PROTECTION COVER

Developed from the need for a smarter, more sustainable alternative to plastic wrapping film, our reusable Transport & Protection Cover offers a superior solution in every way.

These custom-made covers are designed to provide a smart and durable solution for safeguarding large modular units and their stored contents against weather conditions, pollution and other external factors during storage, loading or transport.

93%
Reduction of plastic usage

Thanks to our innovative folding system, units with flexible dimensions can be packed tightly, neatly and securely. Additionally, the lightweight material provides an easy-to-operate protective solution throughout the logistics process.

With its low production costs and high reusability, the Transport & Protection Cover is an intelligent choice.
By choosing reusable materials over plastic, you not only save money but also significantly reduce plastic waste.

It's a solution that's better for both the environment and your wallet.

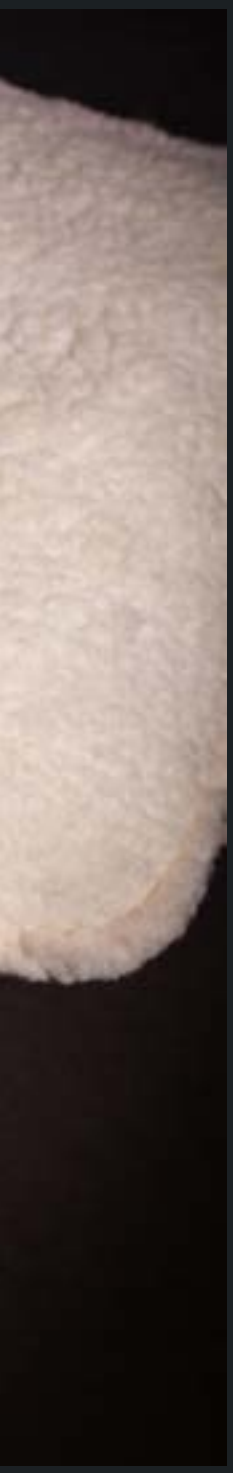
INDUSTRIAL SOLUTIONS

HEATING CUSHIONS IN LARGE BATCHES

CoverWorks played a key role in the development, large-scale production and distribution of cushions, with integrated heating elements and electrical components to deliver comfort and warmth. Leveraging our expertise in technical textile integration, assembly and packaging, we partnered with the client to create a standout product for the consumer market.

Scan for more info



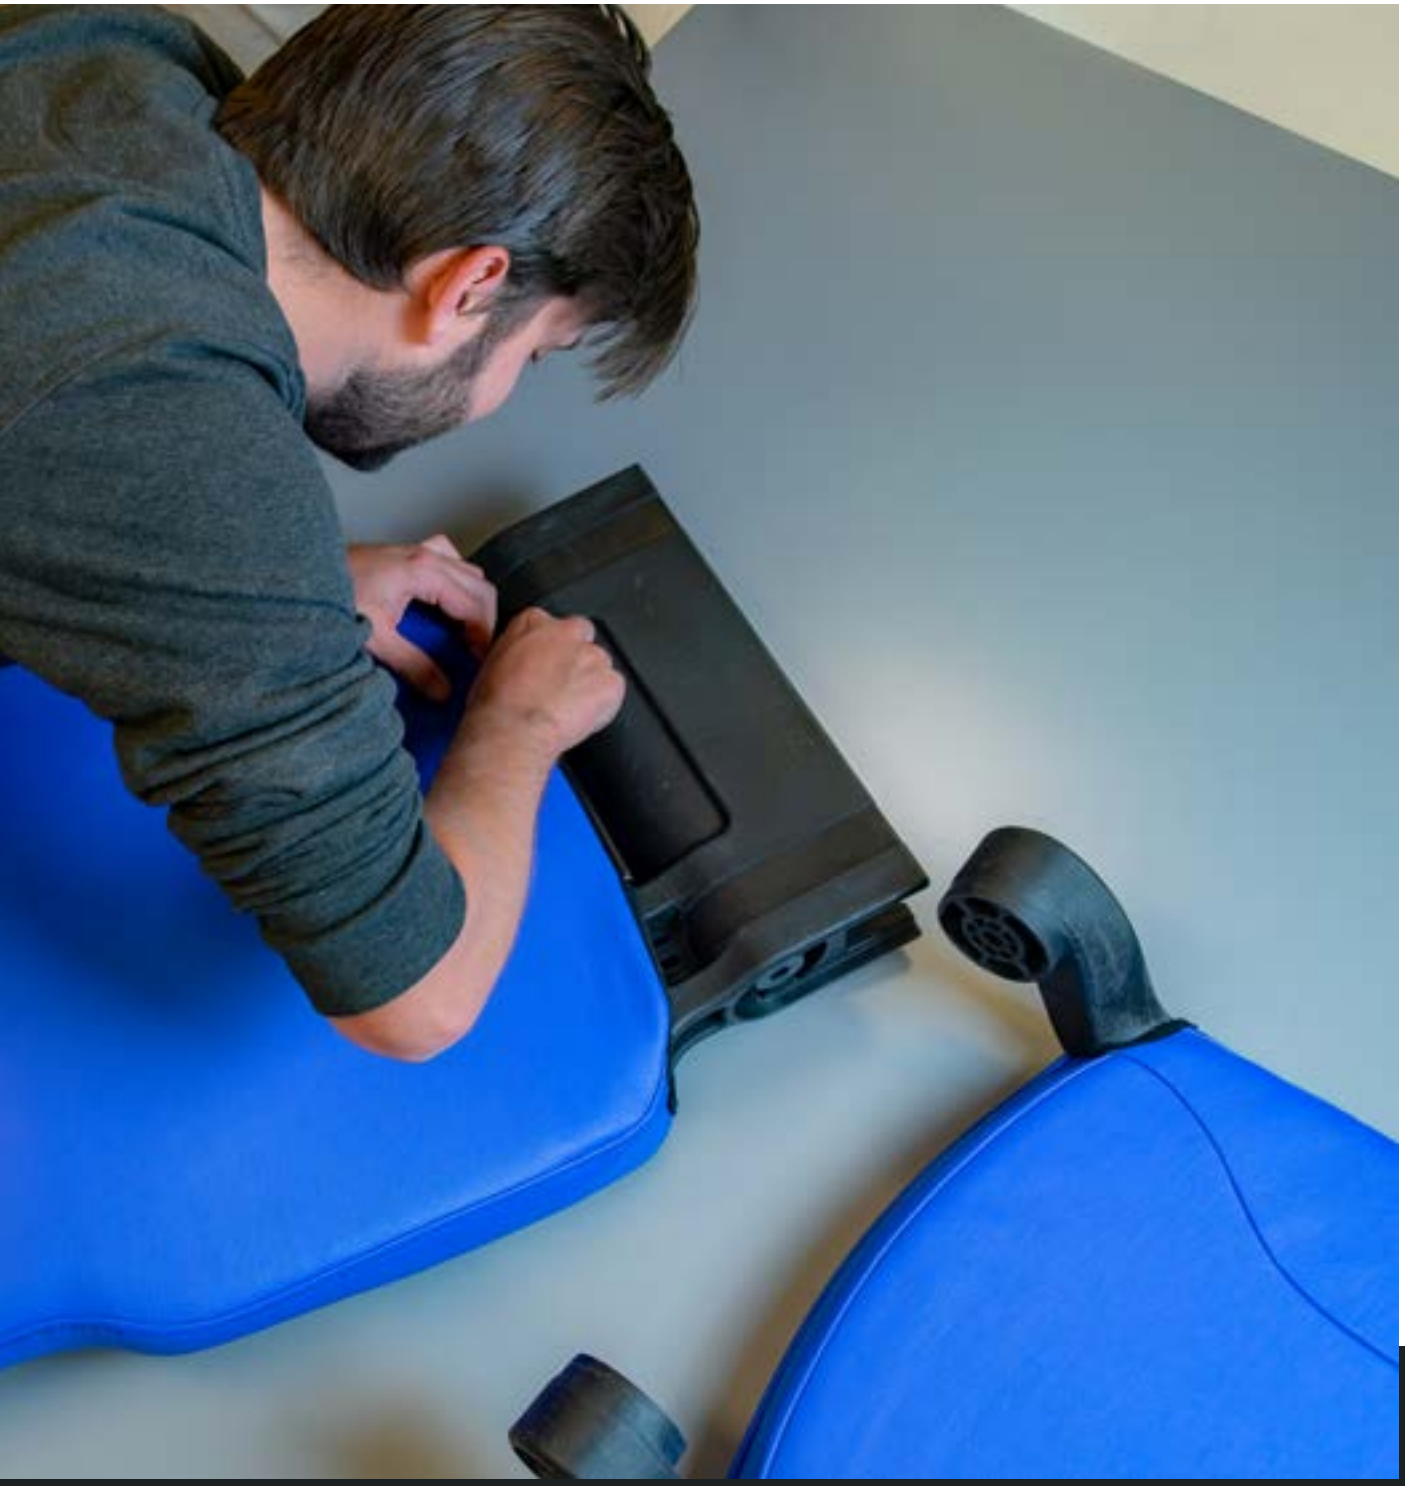
The result? A heating cushion that looks great and feels even better. Made from a variety of soft, stylish and sustainable fabrics, it features built-in infrared heating technology, offering not just warmth, but wellness. It helps relax muscles, promote blood circulation and relieve aches and pains.

INDUSTRIAL SOLUTIONS

CUSTOMIZED UPHOLSTERY STADIUM SEATS

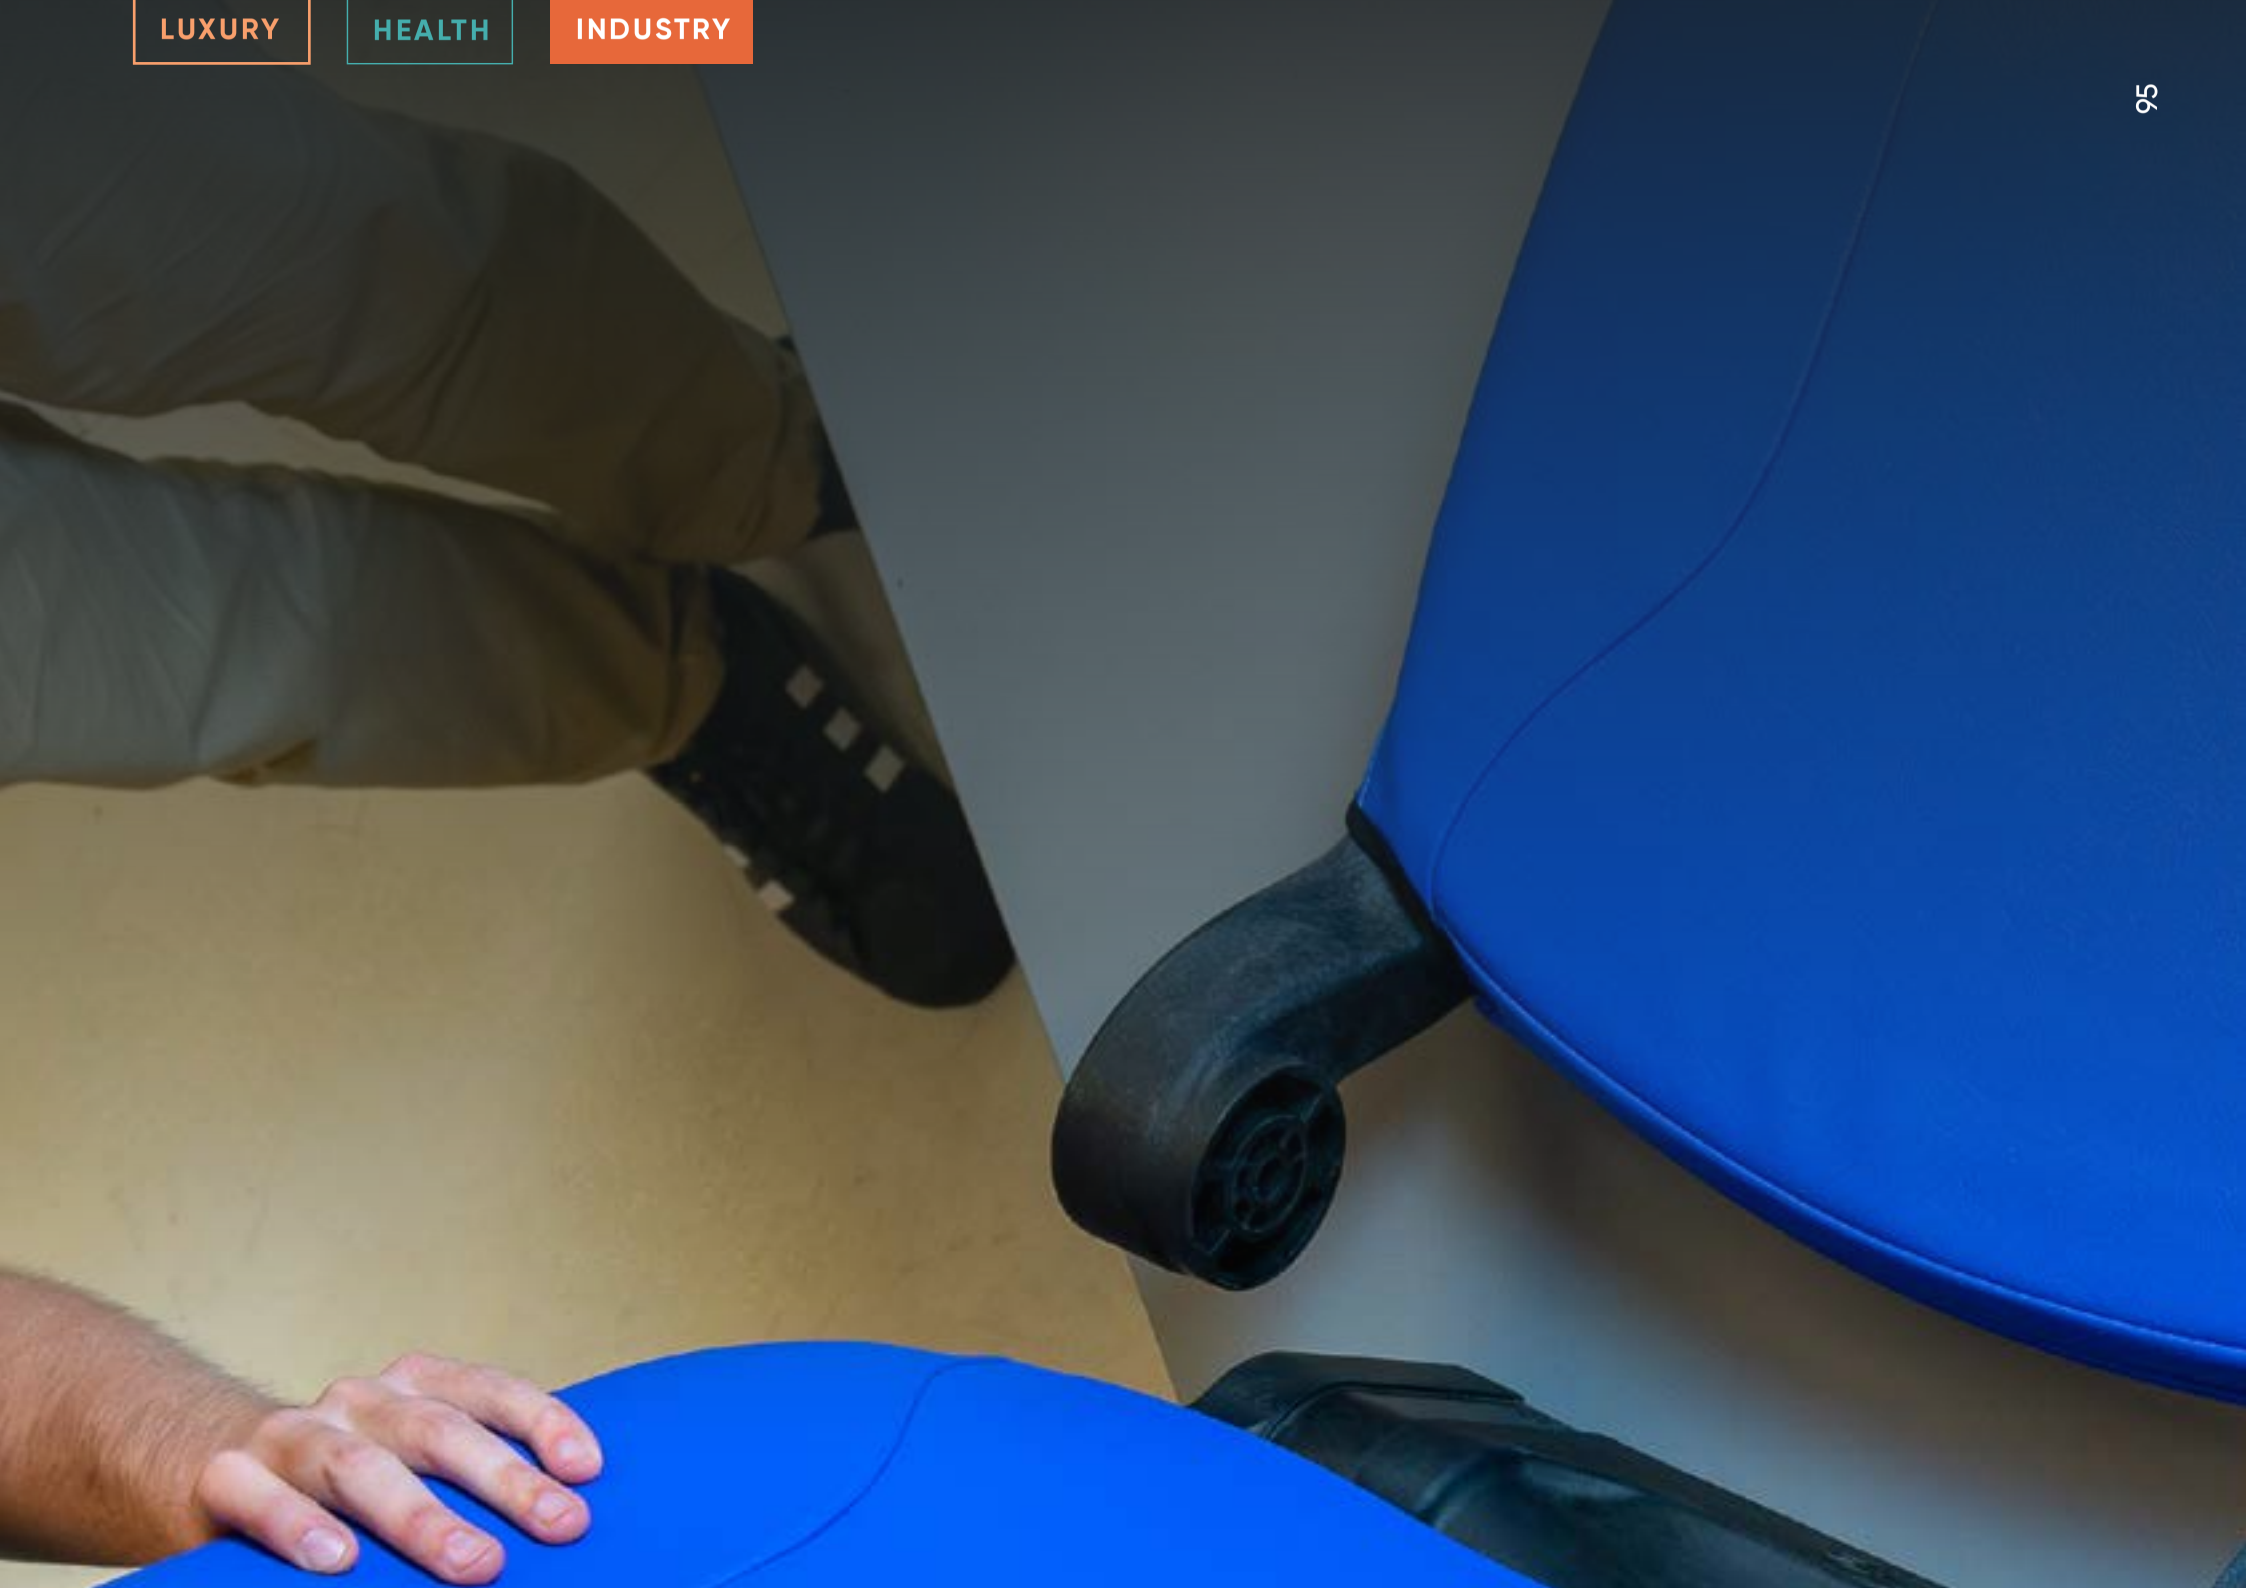
We have worked on various VIP seats for major global sports events and top soccer clubs in premier competitions. Our involvement spans the entire process, from design to delivery.

Scan for more info



CoverWorks supports projects with CMF (Colour, Material, Finish) selection, custom printing, CNC cutting, and custom embroidery to ensure each seat meets both functional and aesthetic standards.

We understand the importance of meeting strict deadlines before events and to deliver high-quality seats. Thanks to our efficient processes and flexible production capabilities, we can quickly adjust, scale u, and keep lead times under control, even with strict schedules.



OUR TECHNIQUES

COMBINING ADVANCED TECHNOLOGY WITH CRAFTMANSHIP

We believe true excellence comes from the perfect balance between cutting-edge technology and the skill of the human hand. Our techniques are more than just processes, they're the tools we use to turn your ideas into high-quality, customized products that perform beautifully and last for years.

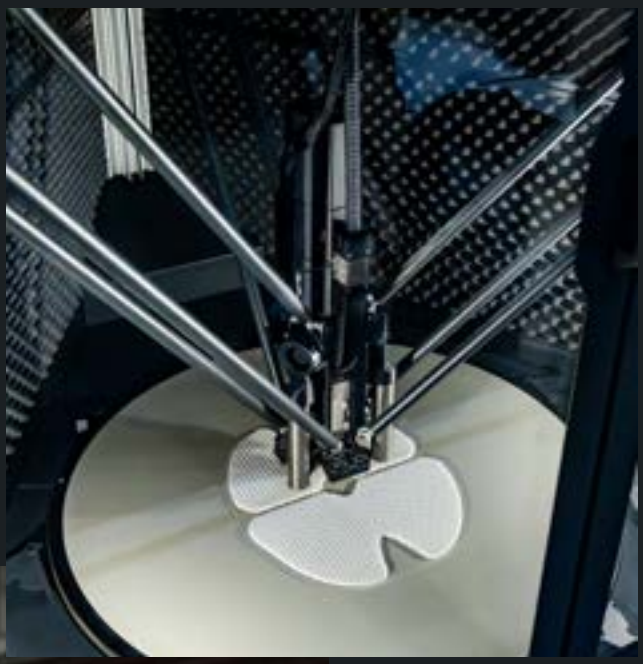
On the following pages, you'll see some of the techniques we commonly apply in our production process. For a full overview, please visit our website by scanning the QR.

POWERLine

OUR TECHNIQUES

CUSTOM 3D PRINTED PRODUCTS

Our 3D printing capabilities transform digital designs into durable, functional components: from custom seating elements to complex prototypes. This approach reduces material waste, accelerates development and enables rapid testing of ideas, helping you move from concept to finished product faster and more efficiently.



BENEFITS OF 3D PRINTING

01 Reduced material consumption

02 Minimized waste

03 Fewer adjustments needed

04 Rapid prototyping

05 Endless possibilities

06 Sustainable

PRECISION CUTTING: CNC, LASER & MORE

Accuracy matters. We use CNC cutting with HSS steel blades for high-speed, clean cuts, electric oscillating tools for intricate patterns in softer materials, and laser cutting for sealed, precise edges. These methods ensure every component fits perfectly, reducing errors and boosting production efficiency.

CNC STITCHING & CAD/CAM INTEGRATION

Our CNC stitching delivers complex patterns, quilting, and decorative finishes with industrial precision. Combined with CAD/CAM technology, we transform 2D and 3D designs into consistent, high-quality products - whether for one-off prototypes or large production runs.

CRAFTMANSHIP

INTELLIGENCE OF OUR HANDS

Technology takes us far, but it can't replace the experience, intuition and attention to detail of our craftspeople. Their skilled hands ensure every stitch, seam, and contour not only meets technical standards but also feels right. This human touch is what turns good products into exceptional ones.

Scan for more info

WATERPROOF STITCHING (WPS)

Our WaterProof Stitching method creates 100% waterproof, dirt-resistant seams without using needles or thread. The result is upholstery that is hygienic, easy to clean, and built to last—ideal for environments where safety, cleanliness, and durability are essential. This means less maintenance, longer product life, and peace of mind for you and your clients.

SAS COMPUTERIZED STITCHING

With SAS stitching, we achieve pinpoint precision in every seam. This computer-controlled process ensures consistent quality across large volumes and allows for intricate, customized patterns. Whether your requirements are highly specialized or simply demand perfection, SAS stitching enables us to deliver upholstery that meets your exact specifications, every time.

SUSTAINABILITY

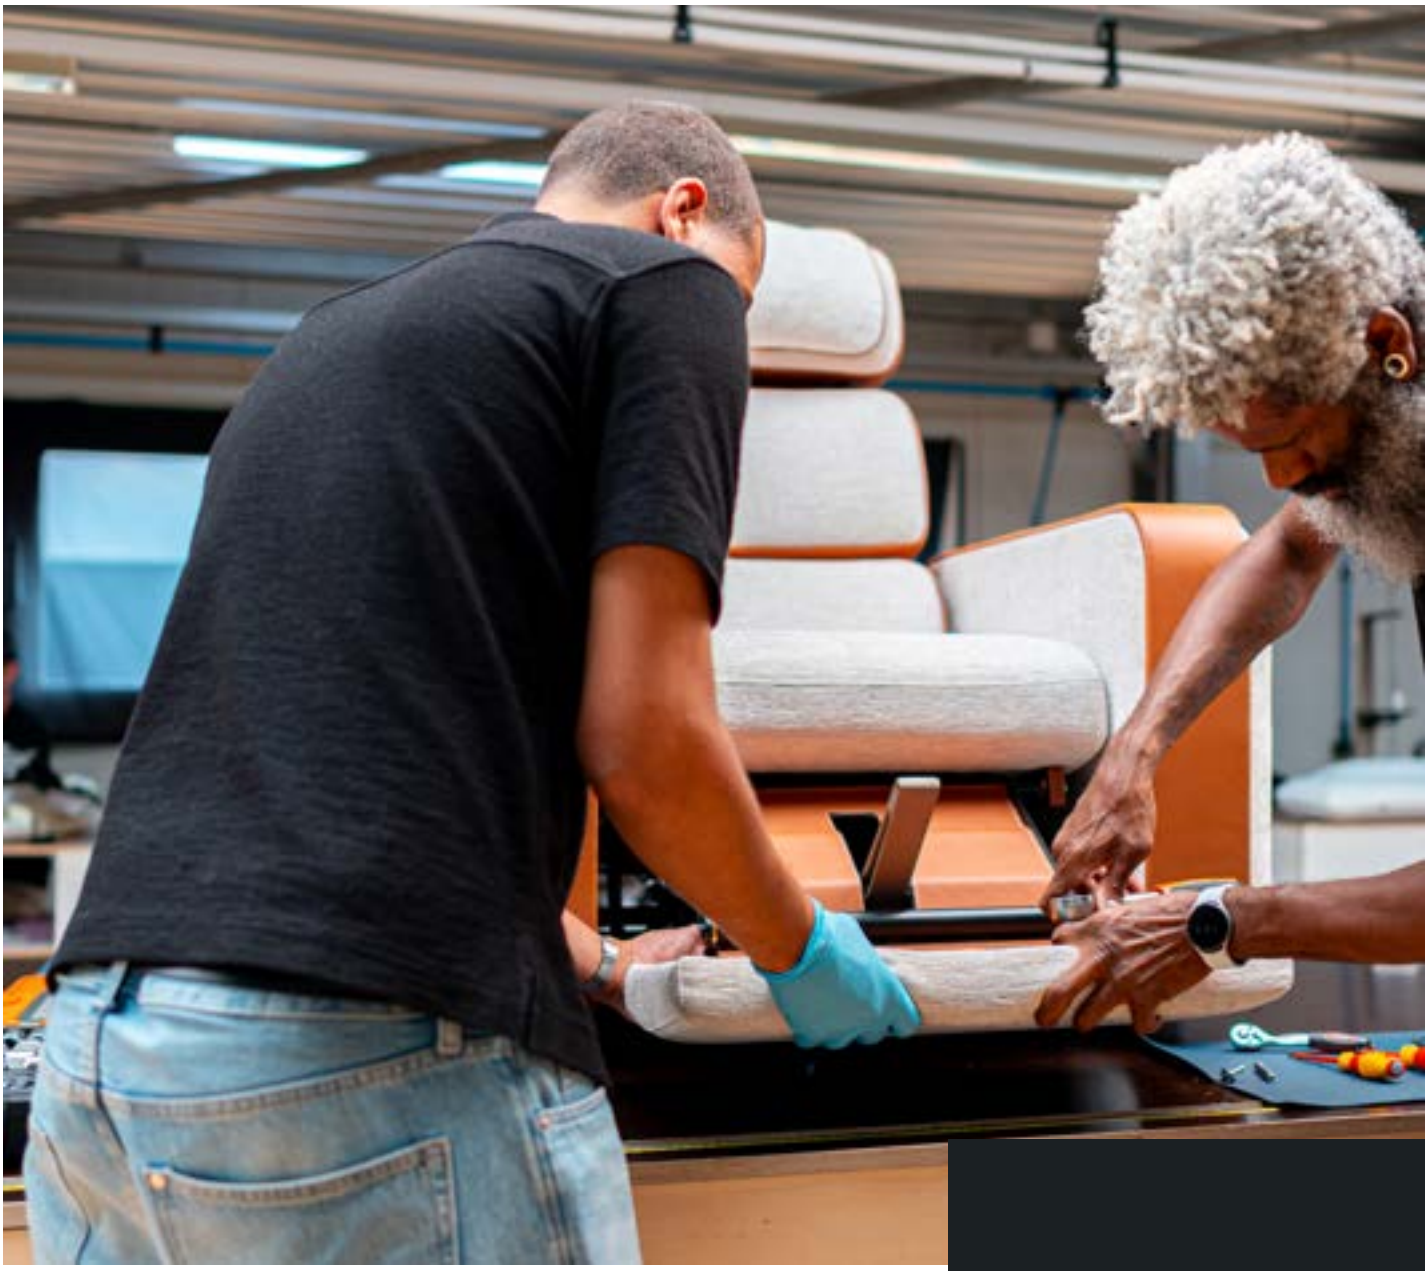
WE DO IT SUSTAINABLY

Sustainability isn't a trend—it's at the core of everything we do. From reducing plastic waste with reusable covers to minimizing offcuts through CNC and 3D printing, we design with the planet in mind. Choosing CoverWorks means embracing innovative, circular solutions that lower costs, reduce waste, and strengthen your brand's reputation.

Together, we make a positive impact through:

- ✓ Sustainable production with efficient use of resources
- ✓ Minimizing waste by adopting smart, innovative technologies
- ✓ Contributing to the circular economy by creating products that last longer and can be reused

PFAFF



WE'VE GOT YOU COVERED

Behind every CoverWorks product is a dedicated team of over 65 specialists; designers, upholsterers, engineers and project managers, all committed to delivering excellence. By combining creative vision with technical expertise, we ensure every project meets your exact standards.

With our Design, Develop, Deliver approach, your ideas are in the hands of experts who make them happen. Not just at the beginning or end, but throughout every phase of your project.

We make it happen, every step of the way.
